UNIVERSITY OF MUMBAI

Revised Syllabus

For

Master of Computer Applications: MCA

Semester I and II

Under

FACULTY OF TECHNOLOGY

(As per Choice Based Credit and Grading System)

From,

Academic Year 2016-17

From Co-ordinator's Desk:

To meet the challenge of ensuring excellence in Master Program in Computer Applications (M.C.A.: referred as Master of Computer Applications) education, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited. In line with this Faculty of Technology of University of Mumbai has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

Faculty of Technology, University of Mumbai, in one of its meeting unanimously resolved that, each Board of Studies shall prepare some Program Educational Objectives (PEO's) and give freedom to affiliated Institutes to add few (PEO's) and course objectives and course outcomes to be clearly defined for each course, so that all faculty members in affiliated institutes understand the depth and approach of course to be taught, which will enhance learner's learning process. It was also resolved that, maximum senior faculty from colleges and experts from industry to be involved while revising the curriculum. I am happy to state that, each Board of studies has adhered to the resolutions passed by Faculty of Technology, and developed curriculum accordingly. In addition to outcome based education, semester based credit and grading system is also introduced to ensure quality of Master of Computer Applications (MCA) education.

Semester based Credit and Grading system enables a much required shift in focus from teacher centric to learner centric education since the workload estimated is based on the investment of time in learning and not in teaching. It also focuses on continuous evaluation which will enhance the quality of education. University of Mumbai has taken a lead in implementing the system through its affiliated Institutes and Faculty of Technology has devised a transparent credit assignment policy and adopted ten points scale to grade learner's performance. Choice Based Credit and Grading System is implemented for First Year of Master of Computer Applications (M.C.A.) from the academic year 20162017. Subsequently this system will be carried forward for Second Year and Third Year of M.C.A. in the academic years 2017 2018 and 20182019 respectively.

Dr. S. K. Ukarande

Co-ordinator,
Faculty of Technology,
Member Academic Council
University of Mumbai, Mumbai

Preamble:

It is a privilege to present the revised Choice Based Credit and Grading System(CBCGS) syllabus of Master of Computer Applications (M.C.A.) for Sem I and Sem II (effective from year 2016-17) with inclusion of outcome based approach and project based learning. The syllabus is designed keeping in view the requirements of Industry. The basic objective of the syllabus is to equip the students with the necessary knowledge, skills and foundation required for Application development.

Since the M.C.A. programme is inclined more towards Application Development and thus has more emphasis on latest programming languages and tools to develop better and faster applications using integrated approach. For this, the integrated lab concepts like mini-projects are introduced in Sem I and Sem II. The syllabus of Sem I and Sem II include the combination of various subject in the area of Business Management, Mathematics and Information Technology.

Dr.Dhananjay R.Kalbande

Chairman- Ad-hoc Board of Studies of Computer Application,
Member- Academic Council,
University of Mumbai, Mumbai.

UNIVERSITY OF MUMBAI

Revised syllabus (Rev- 2016) from Academic Year 2016 -17
Under

FACULTY OF TECHNOLOGY

Master of Computer Applications: MCA

Second Year with Effect from **AY 2017-18**
Third Year with Effect from **AY 2018-19**

As per **Choice Based Credit and Grading System**
with effect from the AY 2016–17

From Co-ordinator's Desk:

To meet the challenge of ensuring excellence in Master Program in Computer Applications (M.C.A.: referred as Master of Computer Applications) education, the issue of quality needs to be addressed, debated and taken forward in a systematic manner. Accreditation is the principal means of quality assurance in higher education. The major emphasis of accreditation process is to measure the outcomes of the program that is being accredited. Inline with this Faculty of Technology of University of Mumbai has taken a lead in incorporating philosophy of outcome based education in the process of curriculum development.

Faculty of Technology, University of Mumbai, in one of its meeting unanimously resolved that,

Each Board of Studies shall prepare some Program Educational Objectives(PEO's) and give freedom to affiliated Institutes to add few (PEO's) and course objectives and course outcomes to be clearly defined for each course, so that all faculty members in affiliated institutes understand the depth and approach of course to be taught, which will enhance learner's learning process. It was also resolved that, maximum senior faculty from colleges and experts from industry to be involved while revising the curriculum. I am happy to state that, each Board of studies has adhered to the resolutions passed by Faculty of Technology, and developed curriculum accordingly. In addition to outcome based education, semester based credit and grading system is also introduced to ensure quality of Master of Computer Applications (MCA) education.

Semester based Credit and grading system enables a much required shift in focus from teacher centric to learner centric education since the workload estimated is based on the investment of time in learning and not in teaching. It also focuses on continuous evaluation which will enhance the quality of education. University of Mumbai has taken a lead in implementing the system through its affiliated Institutes and Faculty of Technology has devised a transparent credit assignment policy and adopted ten points scale to grade learner's performance. Choice Based Credit and Grading System are implemented for First Year of Master of Computer Applications (M.C.A.) from the academic year 2016-2017. Subsequently this system will be carried forward for Second Year and Third Year of M.C.A. in the academic year's 2017-2018 and 2018-2019 respectively.

Dr. S. K.Ukarande

Co-ordinator,

Member AcademicCouncil
University of Mumbai,Mumbai

Preamble:

The MCA Choice based syllabus is designed considering various modes of effective teaching-learning and assessment that reflect in its interdisciplinary approach required for advanced application course. This integrated teaching methodology allows understanding of interaction between the different business areas required for IT enabled industries. This methodology also allows students to develop multiple skills such as critical logic analysis, numerical ability, Database programming, Algorithmic optimization with testing, networking, report writing, communication skill, presentation skills,independent research,and working with real-life case studies. These skills further enable the students to take a full, active and responsible role in the IT enabled industries.

The syllabus is directional in wide scope and allows the much desired flexibility to keep speed with the ever growing body of knowledge and explorations in IT enabled industriesconsidering human side of enterprise. The course structures are carefully designed so that students get superiority in dealing with diverse situations when they step into the corporate world.

I would like to extend my thanks to Industries like IBM India Pvt. Ltd., Accenture,RBS India Pvt.Ltd., Myglamm, N.I.C. etc for their valuable inputs to strength the scope and contents of the syllabus. I would also like to extend my thanks to all M.C.A. Faculty members for their contribution in designing an outcome based curriculum.

Dr.Dhananjay R.Kalbande

Chairman- Ad-hoc Board of Studies of Computer Application,
Member- Academic Council,
University of Mumbai, Mumbai.

		20	20	20	80	-	-	-	100

Pre-requisites:

Basic Understanding of C Programming Language
Knowledge of Algorithms and Control Flow of a program

Course Educational Objectives (CEO):

CEO 1	To Explore and Study Object oriented programming and advanced C++ concepts.
CEO 2	To Improve problem solving skills by applying object oriented techniques to solve bigger computing problems.
CEO 3	To provide a Strong foundation for advanced programming.

Course Outcomes: At the end of the course, the students will be able to:

MCA101.1	Comprehend Object oriented programming concepts and their application
MCA101.2	To write applications using C++.
MCA101.3	Implement programming concepts to solve bigger problems.

Syllabus

Sr. No.	Module	Detailed Contents	Hours
1	**Programming Basics**	Introduction to Programming, Programming Paradigms, Programming Languages and Types. Introduction to C - Basic Program Structure, Execution flow of C Program, Directives, Basic Input /Output Introduction to Object Oriented Programming- OOP concepts, Advantages, Applications, Comparison of C and C++-Data Types, Control Structures, Operators and Expressions	8
2	**Introduction to C++**	Structure of a C++ program, Execution flow, Classes and Objects, Access modifiers, Data Members, Member Functions, Inline Functions, Passing parameters to a Function(pass by Value, Pass by Address, Pass by Reference), Function with default arguments, Function Overloading, Object as a Parameter, Returning Object Static data members and functions, Constant Data members and functions Constructors- Default, Parameterized, Copy, Constructor Overloading, Destructors Arrays, Array as a Class Member, Array of Objects, Strings-Cstyle strings and String Class	10
3	**Operator Overloading and Pointers**	Operator Functions-Member and Non Member Functions, Friend Functions Overloading Unary operators Overloading binary operators(Arithmetic, Relational, Arithmetic Assignment, equality), Overloading Subscript operator Type Conversion Operators- primitive to Object, Object to primitive, Object to Object Disadvantages of operator Overloading, Explicit and Mutable Pointers, Pointer and Address of Operator, Pointer to an Array and Array of Pointers, Pointer arithmetic, Pointer to a Constant and Constant Pointer, Pointer Initialization, Types of Pointers(void, null and dangling), Dynamic Memory Allocation, Advantages and Applications of pointers	10
4	**Inheritance and Polymorphism**	Inheritance Concept, Protected modifier, Derivation of Inheritance- Public, Private and Protected, Types of Inheritance-Simple, Multilevel, Hierarchical, Multiple, Hybrid, Constructors and Inheritance, Function Overriding and Member hiding Multiple Inheritance, Multipath inheritance – Ambiguities and solutions Polymorphism, Static and Dynamic Binding, Virtual Functions, Pure Virtual Functions, Virtual destructors, Abstract Classes, Interfaces	8
5	**Streams and**	Files, Text and Binary Files, Stream Classes, File IO using	8

	Exceptions	Stream classes, File pointers, Error Streams, Random File Access, Manipulators, Overloading Insertion and extraction operators Error handling, Exceptions, Throwing and catching exceptions, Custom Exceptions, Built in exceptions	
6	Advanced C++	Casting- Static casts, Const Casts, Dynamic Casts, and Reinterpret Casts. Creating Libraries and header files. Namespaces Generic Programming, Templates, Class Templates, Function Templates, Template arguments, STL Database Programming with MySQL	8

2. Object Oriented Programming in C++,4th Edition,Robert Lafore,SAMS Techmedia
3. The Complete Reference-C++,4th Edition. Herbert Schildt,Tata McGraw-Hill
4. The C++ Programming Language, 4th Edition,BjarneStroustrup,AddisonWesly
5. Starting Out with C++ Early Objects,8th Edition,Tony Gaddis et al,Addison-Wesley
6. C++ How to Program,8th Edition,Deitel and Deitel, Prentice Hall
7. Practical C++ Programming,2nd Edition,Steve Quoaline,O'reilly Publication
8. Absolute C++,4th Edition, Walter Savitch,Pearson Education

Web References:
1. https://dev.mysql.com
2. www.github.com

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

1. Question paper will comprise of total six questions.

2. Question Number One should be compulsory.

3. All question carry equal marks.

4. Students can attempt any three from the remaining.

5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name		Credits
MCA102	**Software Engineering & Project Management**		**04**

		20	20	20	80	-	-	-	100

Pre-requisites:

Knowledge of structured programming language and Application development.

Course Educational Objectives (CEO):

CEO 102.1	To understand the process of Software Engineering
CEO 102.2	To conceptualize the Software Development Life Cycle (SDLC) models.
CEO 102.3	To familiarize Project Management framework and Tools

Course Outcomes: At the end of the course, the students will be able to:

MCA102.1	Apply use of knowledge of Software Life Cycle to successfully implement the projects in the corporate world.
MCA102.2	Identify the Inputs, Tools and techniques to get the required Project deliverable and Product deliverable using 10 Knowledge areas of Project Management.
MCA102.3	Implement Project Management Processes to successfully complete project in IT industry.

Syllabus

Sr. No	Module	Detailed Contents	Hours
1	**Introduction to software engineering and project management**	Introduction to Software Engineering: Software, Evolving role of software, Three "R"-Reuse, Reengineering and Retooling, An Overview of IT Project Management: Define project, project management framework, The role of project Manager, Systems View of Project Management, Stakeholder management, Project phases and the project life cycle.	**6**
2	**Software Process Models**	Waterfall Model, Evolutionary Process Model: Prototype and Spiral Model, Incremental Process model: Iterative approach, RAD, JAD model, Concurrent Development Model, Agile Development: Extreme programming, Scrum.	**6**
3	**Software Requirement Analysis and Specification**	Types of Requirement, Feasibility Study, Requirement Analysis and Design: DFD, Data Dictionary, HIPO Chart, Warnier Orr Diagram, Requirement Elicitation: Interviews, Questionnaire, Brainstorming, Facilitated Application Specification Technique (FAST), Use Case Approach. SRS Case study, Software Estimation: Size Estimation: Function Point (Numericals). Cost Estimation: COCOMO (Numericals), COCOMO-II (Numericals). Earned Value Management.	**11**
4	**Software Project Planning**	Business Case, Project selection and Approval, Project charter, Project Scope management: Scope definition and Project Scope management, Creating the Work Breakdown Structures, Scope Verification, Scope Control.	**8**
5	**Project Scheduling and Procurement management**	Relationship between people and Effort: Staffing Level Estimation, Effect of schedule Change on Cost, Degree of Rigor & Task set selector, Project Schedule, Schedule Control, CPM (Numericals), Basic Planning Purchases and Acquisitions, Planning Contracting, Requesting Seller Responses, Selecting Sellers, Out Sourcing: The Beginning of the outsourcing phenomenon, Types of outsourcing relationship, The realities of outsourcing, Managing the outsourcing relationship.	**6**
6	**Software Quality**	Software and System Quality Management: Overview of ISO 9001, SEI Capability Maturity Model, McCalls Quality Model, Six Sigma, Formal Technical Reviews,	**7 Hrs**

		Tools and Techniques for Quality Control, Pareto Analysis, Statistical Sampling, Quality Control Charts and the seven Run Rule. Modern Quality Management, Juran and the importance of Top management, Commitment to Quality, Crosby and Striving for Zero defects, Ishikawa and the Fishbone Diagram.	
7	**Human Resource Management**	Human Resource Planning, Acquiring the Project Team: Resource Assignment, Loading, Leveling, Developing the Project Team: Team Structures, Managing the Project Team, Change management: Dealing with Conflict & Resistance Leadership & Ethics.	**4 Hrs**
8	**Software Risk Management and Reliability issues**	Risk Management: Identify IT Project Risk, Risk Analysis and Assessment, Risk Strategies, Risk Monitoring and Control, Risk Response and Evaluation. Software Reliability: Reliability Metrics, Reliability Growth Modeling.	**4 Hrs**

Reference Books:
1. Software Engineering, 5th and 7th edititon, by Roger S Pressman, McGraw Hill publication.
2. Managing Information Technology Project, 6edition, by Kathy Schwalbe, Cengage Learning publication.
3. Information Technology Project Management by Jack T Marchewka Wiley India publication.
4. Software Engineering 3rd edition by KK Agrawal, Yogesh Singh, New Age International publication.
5. Software Engineering Project Management by Richard H. Thayer Wiley India Publication.
6. Software Engineering for students: A Programming Approach by Douglas Bell, Pearson publication.

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: guidelines for setting up the question paper.
1. Question paper will comprise of total six questions.
2. Question Number One should be compulsory.
3. All question carry equal marks.
4. Students can attempt any three from the remaining.
5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name		Credits
MCA103	**Computer Organization and Architecture**		**04**

MCA 103	**Computer Organization and Architecture**	Theory Marks				TW	Pract	Oral	Total
		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	-	-	-	100

Pre-requisites:
Basic knowledge of Computer Fundamentals

Course Educational Objectives (CEO):

CEO1	To have a understanding of Digital systems and operation of a digital computer.
CEO2	To learn different architectures & organizations of memory systems, processor organization and control unit.
CEO3	To understand the working principles of multiprocessor and parallel organization's as advanced computer architectures

Course Outcomes: At the end of the course, the students will be able to:

MCA103.1	Design trade-offs Basic fundamentals in digital logic & structure of a digital computer
MCA103.2	Identify performance issues in processor and memory design of a digital computer.
MCA103.3	To Develop independent learning skills and be able to learn more about different computer architectures and hardware.
MCA103.4	To articulate design issues in the development of Multiprocessor organization & architecture.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Fundamentals of Digital Logic**	Boolean Algebra, Logic Gates, Simplification of Logic Circuits: Algebraic Simplification, Karnaugh Maps. Combinational Circuits : Adders, Mux, De-Mux, Sequential Circuits : Flip-Flops (SR, JK & D), Counters : synchronous and asynchronous Counter	12
2	**Computer System**	Comparison of Computer Organization &Architecture, Computer Components and Functions, Interconnection Structures. Bus Interconnections, Input / Output: I/O Module, Programmed I/O, Interrupt Driven I/O, Direct Memory Access	06
3	**Memory System Organization**	Classification and design parameters, Memory Hierarchy, Internal Memory: RAM, SRAM and DRAM, Interleaved and Associative Memory. Cache Memory: Design Principles, Memory mappings, Replacement Algorithms, Cache performance, Cache Coherence. Virtual Memory, External Memory : Magnetic Discs, Optical Memory, Flash Memories, RAID Levels	08
4	**Processor Organization**	Instruction Formats, Instruction Sets, Addressing Modes, Addressing Modes Examples with Assembly Language [8085/8086 CPU] , Processor Organization, Structure and Function. Register Organization, Instruction Cycle, Instruction Pipelining. Introduction to RISC and CISC Architecture, Instruction Level Parallelism and Superscalar Processors: Design Issues.	12
5	**Control Unit**	Micro-Operations, Functional Requirements, Processor Control, Hardwired Implementation, Micro-programmed Control	04
6	**Fundamentals of Advanced Computer Architecture**	Parallel Architecture: Classification of Parallel Systems, Flynn's Taxonomy, Array Processors, Clusters, and NUMA Computers. Multiprocessor Systems : Structure & Interconnection Networks, Multi-Core Computers: Introduction, Organization and Performance.	08
7	**Case Study**	Case study : Pentium 4 processor Organization and Architecture	02

Reference Books:
1. Modern Digital Electronics, R.P.Jain, 4e, Tata Mc Graw Hill.
2. Computer Organization & Architecture, William Stallings, 8e, Pearson Education.
3. Computer Architecture & Organization, John P. Hayes, 3e, Tata McGraw Hill.
4. Computer Organization, 5e, Carl Hamacher, Zconko Vranesic & Safwat Zaky, Tata McGraw Hill.
5. Digital Computer Fundamentals, Bartee C. Thomas , McGraw-Hill International Edition
6. Computer System Architecture, M. Morris Mano, Pearson Education.
7. Computer Architecture & Organization, Nicholas Carter, McGraw Hill.

8. Computer Architecture & Organization, 2e, Miles Murdocca & Vincent Heuring, Wiley India.

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

1. Question paper will comprise of total six questions.
2. Question Number One should be compulsory.
3. All question carry equal marks.
4. Students can attempt any three from the remaining.
5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	-	-	-	100

Pre-requisites:

Basic knowledge Information Technology

Course Educational Objectives (CEO):

CEO 1	Understand Information Technology and its practices in managing the business.
CEO 2	Conceptualize the process of Technology acquisition in an Industry.
CEO 3	Familiar with impact and issues of Information Technology for managing business operations with social concern.

Course Outcomes: At the end of the course, the students will be able :

MCA101.1	To use various IT tools used for managing the Industrial operation.
MCA101.2	To apply the decision for selecting the proper IT tools for Management operation.
MCA101.2	To design the strategic plan for using Information Technology in Management

Syllabus

Sr. No.	Module	Detailed Contents	Hours
1	**Information Technology Support and Application**	Introduction to Information Technology, Business Values Of IT, Role Of Computer in Modern Business, Current Trends, Business in Digital Economy.	6
2	**Information System and business applications**	Introduction to Information System: Information System, Classification and type of Information System, Information system Infrastructure and architecture, Role of Information systems in Business Today, Perspective on Information systems, Software and hardware platform to Improve Business Performance, Management opportunities challenges and Solutions, Business applications: Roles of IT in E-commerce, M-commerce.	8
3	**Acquisition of Information Technology**	Need to acquire technology, developing new technologies, Increasing strategic options, Gaining efficiency improvements, sources for acquiring technology, Responding to the competitive environment.	8
4	**Impact of Information Technology on organization and Strategic Issues of Information Technology**	Impact of Information Technology on organization : Modern Organizations ,Creating New Types of Organizations Strategic Issues of Information Technology: Information Technology and Corporate Strategy, Creating and Sustaining a Competitive Edge, Integrating Technology with the Business Environment, Managing Information Technology	8
5	**IT for managing International business and Governance**	International Business and IT technologies: International Business Strategies, Key Issues in International Environment, Managing IT Internationally. Governance concept: IT Governance, Internet governance, E-governance and internal IT processes.	10
6	**Information Technology Issues For Management**	Management in a Technological Environment, The Changing World of Information Action Plan	6
7	**Societal Implications And The Future With Technology**	Social Responsibilities, Ethics and Information Technology, The Future with Information Technology	6

Reference Books

1. Information Technology For Management – Transforming Organizations in Digital Economy by EFRAIM Turban, Dorothy Leidner (WILEY Student Edition)

2. Information Technology For Management by B. MuthuKumaran (OXFORD University Press)

3. INFORMATION TECHNOLOGY FOR MANAGEMENT 7th ed Authors **Henry C Lucas,Mc Graw Hill Publications.**

4. Information Technology For Management by Dr. CH. Seetha Ram.

5. Technology Acquisition ,A guided approach to technology acquisition and protection decision by Mortara and Ford.

6. Business Intelligence: Practices, Technologies, and Management- Rajiv Sabherwal, Irma Becerra-Fernandez

7. Manging and using Information Systems, K E Pearlson, C S Saunders, Wiley India

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

1. Question paper will comprise of total six questions.
2. Question Number One should be compulsory.
3. All question carry equal marks.
4. Students can attempt any three from the remaining.
5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name		Credits

		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	-	-	-	100

Pre-requisites:
 Basic Mathematics, combinatorics and calculus Knowledge.

Course Educational Objectives (CEO):

CEO 1	To equip the students with a working knowledge of probability, statistics, and modeling in the presence of uncertainties.
CEO 2	To understand the concept of hypothesis and significance tests
CEO 3	To help the students to develop an intuition and an interest for random phenomena and to introduce both theoretical issues and applications that may be useful in real life.

Course Outcomes: At the end of the course, the students will be able to:

MCA105.1	Distinguish between quantitative and categorical data
MCA105.2	Apply different statistical measures on data
MCA105.3	Identify, formulate and solve problems
MCA105.4	Classify different types of Probability and their fundamental applications

Syllabus

Sr. No	Module	Detailed Contents	Hours
1	**Measures of Central Tendency &Measures of Dispersion**	Frequency Distribution, Histogram, Stem and leaf diagram, ogives, Frequency Polygon, Mean, Median, Mode, Range, Quartile Deviation, Mean Deviation, Box whisker plot, Standard Deviation, Coefficient of Variation	**8**
2	**Skewness, Correlation & Regression**	Karl Pearson's coefficient of Skewness, Bowley's coefficient of Skewness, Scatter Diagram, Karl Pearson's coefficient of correlation, Spearman's rank correlation coefficient , Linear Regression and Estimation, Coefficients of regression	**8**
3	**Theory of Attributes**	Classes and Class Frequencies, Consistency of Data, Independence of Attributes, Association of Attributes	**4**
4	**Testing of Hypothesis**	Hypothesis, Type I and Type II errors. Tests of significance – Student's t-test:Single Mean, Difference of means, paired t-test, Chi-Square test:Test of Goodness of Fit, Independence Test	**10**
5	**Introduction to Probability**	Random experiment, Sample space, Events, Axiomatic Probability, Algebra of events	**4**
6	**Conditional Probability**	Conditional Probability, Multiplication theorem of Probability, Independent events, Baye's Theorem	**6**
7	**Random variables**	Discrete random variable, Continuous random variable, Two-dimensional random variable, Joint probability distribution, Stochastic independence	**7**
8	**Mathematical Expectation**	Expected value of a random variable, Expected value of a function of a random variable,Properties of Expectation and Variance, Covariance	**5**

Reference Books:

1. Fundamentals of Mathematical Statistics – 1st Edition S.C.Gupta, V.K.Kapoor , S Chand
2. Introduction to Probability & Statistics – 4th Edition J.Susan Milton, Jesse C. Arnold Tata McGraw Hill
3. Fundamentals of Statistics : 7th edition S C Gupta, Himalaya Publishing house
4. Probability and Statistics with Reliability, Queuing, And Computer Science Applications (English) 1st Edition: Kishore Trivedi, PHI
5. Schaum's Outlines Probability, Random Variables & Random Process 3rd Edition Tata McGraw Hill
6. Probability & Statistics for Engineers: Dr J Ravichandran, Wiley
7. Statistics for Business and Economics: Dr Seema Sharma, Wiley
8. Applied Business Statistics 7th Edition Ken Black, Wiley

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

1. Question paper will comprise of total six questions.
2. Question Number One should be compulsory.
3. All question carry equal marks.
4. Students can attempt any three from the remaining.
5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

MCA L101	**Lab 1-SEPM and OOP Lab**				**25**	**50**	**25**	**100**

Pre-requisites:

Basic Understanding of C Programming Language
Knowledge of Algorithms and Control Flow of a program

Course Educational Objectives (CEO):

CEO 1	To Understand Concepts of Object oriented programming and basics of Software Engineering
CEO 2	To learn how C++ supports Object Oriented Principles.
CEO 3	To Study Design of reliable and maintainable Object Oriented Applications using an Integrated Software Engineering Approach.

Course Outcomes: Students will be able to:

MCA L101.1	Design and Develop the solution to a problem using Object Oriented Programming Concepts
MCA L101.2	Demonstrate use of C++ Concepts
MCA L101.3	Develop real time applications.

Sr. No.	Module	Detailed Contents	Hours
1	**Programming Basics**	Basic Programs using C Programming Assignments using Control Structures Logic Building Programming Assignments	8
2	**Introduction to C++**	Programming Assignments Using Classes Programming Assignments using Static members and Methods Programming Assignments using Constant members and Methods Programming Assignments using Arrays and Strings	8
3	**Operator Overloading and Pointers**	Programming Assignments to Overload Operators Programming Assignments for Data Conversions Programming Assignments Using Pointers	8

4	**Inheritance and Polymorphism**	Programming Assignments based on Inheritance and Polymorphism	8
5	**Streams and Exceptions**	Programming Assignments based on Streams and Exceptions	8
6	**Advanced C++**	Programming Assignments based on Templates Case Study- Database Connectivity using MySQL	8
7	**SRS**	Business Case Software Requirement Specification (SRS to be attached for any sample project)	4
8	**Scheduling Tools and WBS**	Introduction to Project Scheduling tools (any open source softwares) Creating a Project Plan or WBS Establishing the Project Start or Finish Date Entering Tasks Attach Supporting Information Entering Task Durations Setting Task Constraints (Milestones) Gantt chart Pert/CPM chart	8
9	**Resource Management**	Resource Management (using open source tool) Managing Project Cost	4
10	**Cost Estimation and Quality Standards**	Solving examples using COCOMO and COCOMO II models, CPM numerical Case studies on Quality Standards	4
11	**A Mini Project**	–It is based on OOP and SE PM using an integrated approach (Maximum two students in a group)	10

Pre-requisites: Basic understanding of programming fundamentals

Course Educational Objectives (CEO):

CEO 1	To study the concept and architecture of World Wide Web.
CEO 2	To learn web application development using open source technology.
CEO 3	To provide skills to design and develop dynamic web sites.

Course Outcomes: At the end of the course student will be able to

MCA L102.1	Acquire knowledge about functionality of world wide web
MCA L102.2	Develop web based applications using open source technology.
MCA L102.3	Design and develop dynamic web sites.

Syllabus

Sr. No.	Module	Detailed Contents	Hours
1.	**Introduction to the Web Technologies**	Concept of WWW, Internet and WWW, HTTP Protocol: Request and Response, Web browser and Web servers.	**06**
2.	**HTML**	Basics of HTML, Structure of HTML code, formatting and fonts, color, hyperlink, lists, tables, images (Programming Assignments based on above topics)	**12**
3.	**Style Sheets**	Need for CSS, introduction to CSS, basic syntax and structure, Classes and Pseudo Classes, CSS tags for setting background images, colors and properties, manipulating texts, using fonts, borders and boxes, margins, padding lists, positioning etc. (Programming Assignments based on above topics)	**12**
4.	**Introduction to PHP**	Configuration and Installation of PHP, basic syntax of PHP, Expressions, Statements, Arrays, Functions, string, Regular Expressions, Date and Time Functions	**12**

		(Programming Assignments based on above topics)	
5.	**PHP and MySQL**	File Handling- Creating a File, Reading from Files, Copying Files, Moving File, Deleting File, Updating File, Uploading Files, Form Designing using HTML 5, Validation's using PHP Connection to server, creating database, selecting a database, listing database, listing table names, creating a table, inserting data, altering tables, queries, deleting database, deleting data and tables, Master-Detail relationships using Joins. Session Management- Using Cookies in PHP, HTTP Authentication, Using Sessions (Programming Assignments based on above topics)	**10**
6	**Mini Project**	A Mini – Project based on DS and WAD using an integrated approach.(Maximum Two students in a Group)	**26**

MCA 201	**Data Structures**	Theory Marks				TW	Pract	Oral	Total
		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	-	-	-	100

Pre-requisites:
   Understanding of Algorithms

Course Educational Objectives (CEO):

CEO 1	To teach efficient storage mechanisms of data for an easy access.
CEO 2	To design and implement various basic and advanced data structures.
CEO 3	To introduce various techniques for representation of the data in the real world.

Course Outcomes: At the end of the course, the students will be able to :

MCA201.1	Analyze and compute efficiency of various algorithms.
MCA201.2	Effectively choose the data structure that efficiently model the information in a problem
MCA201.3	Describe how Linear data structures are represented in memory and used by algorithms and their applications
MCA201.4	Identify the benefits of Non-linear Data Structures and their applications

Syllabus

Sr	Module	Detailed Contents	Hours
1	**Introduction to Data Structures & Algorithms**	Introduction of Data structures, Abstract Data Types, Performance Analysis: Space Complexity, Time Complexity, Asymptotic Notations (Big O, Omega, Theta), Performance measurement, Divide and Conquer, Back Tracking Method, Dynamic programming	4
2	**Sorting and searching algorithms**	Bubble sort, Insertion sort, Radix Sort, Quick sort, Merge sort, Heap sort, Selection sort, shell Sort, Linear Search, Sequential search, Binary search	6
3	**Hashing**	Different Hashing Techniques, Address calculation Techniques, Common hashing functions, Collision resolution techniques: Linear probe, Quadratic probe, Key offset. Rehashing, Double hashing, Link list addressing.	8
4	**Linear Data Structures**	Stack Definition, Operations, Implementation of Stacks (Array and Linked list) and applications-Evaluation of postfix expression, Balancing of parenthesis Queue: Definition, Operations, Implementation of simple queue (Array and Linked list) and applications of queue-BFS Types of queues: Circular, Double ended, Priority, Implementation using linked list Types of Linked List: Singly, Doubly and Circular Linked list Definition, Operations (Insert, delete, traverse, count, search) Applications of Linked List: Polynomial Addition and Subtraction	14
5	**Non-linear Data Structures**	Tree Definition and concepts, General Tree- Definition, Insertion and Deletion into general tree, Binary Tree- Definition, Insertion and Deletion into binary tree, Traversal of a binary tree, Reconstruction of a binary tree from traversal, Conversion of general tree into binary tree, Huffman tree, Expression tree, Binary threaded three Binary Search Tree- Definition, Operation, Implementation AVL tree- Definition, AVL tree rotation with examples, Heaps-Definition, Operations (insertion, delete, build) M way Tree- Introduction, B tree-definition and examples and B^*	14
6	**Graphs**	Definition, Types, Operations, Representation, Networks, Traversals of graph, Minimum spanning tree, Kruskal's Algorithm, Prim's Algorithm, Warshall's Algorithm,Shortest path algorithm-dijsktra's algorithm	6

Reference Books

1. Richard F Gilberg Behrouz A Forouzan , "Data Structure A Pseudocode Approach with C". Second edition
2. Thomas H. Cormen, Charles E. Leiserson, Ronald L. Rivest, Clifford Stein, "Introduction to ALGORITHMS", PHI, India Second Edition.
3. Shaum's Outlines Data Structure Seymour Lipschutz TMH
4. Michael T.Goodrich "Data Structures and Algorithms in C++-" Wiley Publications

Theory paper will be of **80** marks. **Internal** assessment will be of **20** marks, which will be the average of two tests (T1 and T2) of 20 marks each.

Assessment:

Internal:

Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: **G**uidelines for setting up the question paper.

1. Question paper will comprise of total six questions.
2. Question Number One should be compulsory.
3. All question carry equal marks.
4. Students can attempt any three from the remaining.
5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	-	-	-	100

Pre-requisites: Computer Organization and Architecture

Course Educational Objectives (CEO):

CEO 1	To teach Operating system design
CEO 2	To understand the process concurrency and synchronization, deadlocks and various memory management policies.
CEO 3	To teach the concepts of input/output, storage and file management
CEO 4	To teach various protection and security mechanisms and to study and compare different operating systems & their features.

Course Outcomes: At the end of the course, the students will be able to :

MCA202.1	Classify different styles of operating system designs
MCA202.2	Analyze process management, I/O management, memory management functions of Operating System
MCA202.3	Employ process scheduling and disk scheduling algorithms.
MCA202.4	Explore file management and protection and security concepts.

Syllabus:

Sr No	Module	Detailed Contents	Hours
1	**Introduction to System Software & operating System**	Introduction to System Software & operating System Overview of all system softwares: Compiler, Assembler, Linker, Loader, Operating system, OS services and Components, Types of OS-Batch, multiprocessing, multitasking, timesharing, Distributed OS ,Real time OS, virtual machines, System Calls ,types of System calls, Buffering, Spooling	5
2	**Process and Thread Management**	Process and Thread Management: - Concept of process and threads, Process states, Process management, Context switching, Interaction between processes and OS, Multithreading, CPU scheduling algorithms, multiprocessor scheduling algorithms, Real time scheduling algorithms	10
3	**Concurrency Control**	Concurrency Control: Concurrency and Race Conditions, Mutual exclusion requirements, Software and hardware solutions, Semaphores, Monitors, Classical IPC problems and solutions, Deadlock, Characterization, Detection, Recovery, Avoidance and Prevention	8
4	**Memory Management**	Memory Management: Memory partitioning, Swapping, Paging, Segmentation, Virtual memory, Overlays,Demand paging, Performance of Demand paging, Virtual memory concepts, Page replacement algorithms, Allocation algorithms	9
5	**Mass Storage Structure**	Mass Storage Structure: Secondary-Storage Structure, Disk structure, Disk scheduling, Disk management, Swap-space management, Disk reliability, Stable storage implementation, Introduction to clock, Clock hardware, Clock software	7
6	**File systems**	File systems: File concept, File support, Access methods, Allocation methods, Directory systems, File protection, Free space management	4
7	**Protection & Security**	Protection & Security: Protection- Goals of protection, Domain of protection, Access matrix, Implementation of access matrix, Revocation of access rights Security- The security problem, Authentication, One-Time passwords, Threats	4
8	**Case Study**	Case Study : Study of different Operating, Systems(Linux, Windows, Android OS, iOS)	5

Pre-requisites:

Digital Computer Fundamentals and computer architecture.

Course Educational Objectives (CEO):

CEO 1	To help learners get a grounding of basic network components and architecture.
CEO 2	To explore basic networking models.
CEO 3	To learn the way protocols are used in networks and their design issues.

Course Outcomes: At the end of the course, the students should be able to :

MCA203.1	Comprehend the basic concepts of computer networks and data communication systems.
MCA203.3	Analyze basic networking protocols and their use in network design
MCA203.3	Explore various advanced networking concepts.

Syllabus

Sr. No	Module / Unit	Detailed Contents	Hours
1	**Basics of Digital Communication**	Introduction to digital communication, Signal propagation, Signal types, Signal parameters , Switching & forwarding, Transmission impairments, Attenuation, Delay distortion, Noise, Effects of limited bandwidth, Data rate limits-Nyquist's theorem and Shannon's theorem.	**05**
2	**Network Organization and Models**	Basics of computer Network, topology & types of topologies, types of networks(LAN, MAN, WAN), Concept of Intranet & Extranet, Ad-Hoc Networks, types of communications (Asynchronous and synchronous) , modes of communications (simplex, half duplex, full duplex), Protocols, Networking models, ISO-OSI Reference Model, Design issues of the layer ,Internet Model (TCP/IP), Comparison of ISO-OSI & TCP/IP Model	**06**
3	**Networking Devices**	Connectivity Devices : Passive & Active Hubs, Repeaters, , Switches (2-Layer Switch, 3-Layer switch(Router), Bridges (Transparent Bridges, Spanning Tree, Bridges, Source Routing Bridges) , Brouters, Gateways.	**04**
4	**Application, Presentation & Session Layer**	Principles of Application Layer Protocols, The Web and HTTP, FTP, Telnet, Electronic Mail in the Internet (SMTP, MIME, POP3, IMAP), DNS, Introduction to SNMP.	**06**
5	**Transport layer**	Transport-Layer Services, port addressing, Multiplexing and Demultiplexing, Principles of Reliable Data Transfer, Congestion Control, TCP's Congestion Control. Quality of Service : Introduction, Queue Analysis, QoS Mechanisms, Queue management Algorithms, Feedback, Resource, Reservation.	**10**
6	**Network layer**	Network Service Model, Data gram & Virtual Circuit , Routing Principles, The Internet Protocol,(ipv4 & ipv6) , IP addressing and subnetting, Routing Algorithms., Hierarchical Routing, Routing in the Internet: Intra and inter domain routing; Unicast Routing Protocols RIP, OSPF, BGP, Multicast Routing Protocols : MOSPF, DVMRP. ATM Networks: Need for ATM, ATM Layers, ATM adaptation Layers, IP over ATM, Multi protocol Label switching (MPLS), Drawbacks of traditional routing methods, Idea of TE, TE and Different Traffic classes	**11**
7	**Data Link Layer**	Data Link Layer, Error Detection and Correction Techniques, Multiple Access Protocols, LAN Addresses and ARP & RARP , PPP: The Point-to-Point Protocol , Ethernet standards – IEEE 802.3, 802.5, FDDI, 802.6.	**08**
8	**Physical layer**	Physical Layer, Types of media wired and wireless media	**02**

Reference Books:
1. Computer Networking: A Top-Down Approach Featuring the Internet , J. F. Kurose and K. W. Ross, Seventh Edition, Addison-Wesley.
2. Computer Networks: Principles, Technologies and Protocols for Network design, N. Olifer and V. Olifer, Wiley India
3. Data Communication and Networking, B. A. Forouzan, Fourth Edition, McGraw Hill.
4. Computer Networks, Andrew Tenenbaum, Fifith Edition, PHI .
5. TCP/IP Protocol Suite, B. A. Forouzan, Third Edition, Tata McGraw Hill edition.
6. Data and Computer Communications, William Stallings, Ninth Edition, Pearson Education

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

1. Question paper will comprise of total six questions.
2. Question Number One should be compulsory.
3. All question carry equal marks.
4. Students can attempt any three from the remaining.
5. Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name							Credits
MCA204	**Financial Accounting and Management**							**4**

Subject Code	Subject Name	Teaching Scheme			Credits Assigned

MCA204	**Financial Accounting and Management**	Theory Marks				TW	Pract	Oral	Total
		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	-	-	-	100

Pre-requisites:

Some basic knowledge of accounting and good mathematical skills is recommended.

Course Educational Objectives (CEO):

CEO 1	Introduce the principles, concepts, and applications of financial accounting and management.
CEO 2	Explore, and use the accounting concepts emphasizing how financial statements communicate information about the business corporation's performance and position for users internal and external to management.
CEO 3	To introduce the underlying framework and concepts of Financial Accounting and Management and how these fit into the current global business scenario.

Course Outcomes: At the end of the course, the students should be able to:

MCA204.1	To use accounting functions as an information development and communication system that supports economic decision making and provides value to entities and .
MCA204.2	Preparation of financial statements and related information and apply analytical tools in making both business and financial decisions.
MCA204.3	To analyze the impact of accounting system on several business functions and managers' decision making.
MCA204.4	To analyze and use financial statements; prepare budgets and investment options; assess risks and the rewards involved in firm's financial decisions.

Syllabus

Sr No.	Module	Detailed Contents	Hours
1	**Introduction to Accounting**	Introduction to Accounting:– Principles, Concepts, Double entry system of accounting, introduction to journal, voucher, ledger; preparation of trial balance, final accounts , trading and profit and loss account and balance sheet.(theory and numerical) Accounting Standards - AS1, AS2, AS3,AS9(only Theory), IFRS (International Financial Reporting Standards)	**12**
2	**BEA and Budgeting**	Break-even Analysis:-Concept of Break Even Point, Cost-Volume-Profit Analysis, Determination of Break Even Point, Margin of Safety and PV ratio, Impact of changes in Cost or selling price on BEP - Practical applications of Break-even Analysis. Budgeting: Budgeting–cash budget (theory and numerical), sales budget – flexible Budgets and master budgets (theory).	**12**
3	**Financial Management Concepts**	Financial Management:–Meaning and scope, Objectives of time value of money, goals of FM, profit vs. value maximization. Leverages – operating, financial, composite.; cost of equity, preference and equity shares, bonds and debentures, weighted average cost of capital, capital gearing fundamentals.	**10**
4	**Tools and Techniques of FM**	Tools and Techniques for Financial Statement Analysis:- Ratio Analysis – Classification of Ratios – Short term solvency and long term solvency – Profitability ratios - Analysis and Interpretation of Financial Statements through ratios of Liquidity, Solvency and Profitability. Fund Flow Statement - Meaning, Importance, Statement of changes in working capital and statement of Sources and application of funds. Cash flow Analysis:- cash flow Statements: Preparation, Analysis and interpretation, (only theory)	**10**

| 5 | **Capital Budgeting Concepts** | Capital Budgeting:- Capital and its significance, Types of Capital, Estimation of Fixed and Working capital requirements, Methods and sources of raising capital. Capital Budgeting: features of capital budgeting proposals, Methods of Capital Budgeting: Payback Method; purpose of capital budgeting, capital budgeting process, and types of capital investment decisions. Accounting Rate of Return (ARR) and Net Present Value Method (simple numerical problems on these). | **8** |

		20	20	20	80	-	-	-	100

Pre-requisites:
Basic knowledge of mathematics

Course Educational Objectives (CEO):

CEO 1	To Understand the fundamental ideas of Discrete Mathematics
CEO 2	To Express the decision making concepts as a mathematical model
CEO 3	To Study and identify a real life business problem and computing requirements appropriate to its solution

Course Outcomes: At the end of the course, the students will be able to:

MCA205.1	Develop mathematical and logical thinking
MCA205.2	Model situations from variety of settings in generalised mathematical form
MCA205.3	Solve the real world business problem

Syllabus

Sr	Module	Detailed Contents	Hours
1	**Mathematical logic**	Propositions and logical operations, Conditional Statements , Methods of Proof , Mathematical Induction, Mathematical Statements , Logic and Problem Solving, Normal Forms	8
2	**Sets and Relations**	Set operations and functions, Product sets and partitions, Relations and digraphs, Paths in Relations and Digraphs, Properties of Relations , Equivalence Relations, Operations on Relations, Partially Orders Sets, Hasse diagram	10
3	**Graphs**	Graph, Representation of Graph, Adjacency matrix, Adjacency list, Euler paths and Circuits, Hamiltonian Paths and Circuits	5
4	**Mathematical Models**	Mathematical Models - Vehicular Stopping Distance Modelling using decision theory : Probability and Expected Value (e.g. Rolling the Dice, Life Insurance, Roulette etc) Decision Trees , Classification problems using Bay's theorem	8
5	**Modeling using difference equation**	Recurrence relation - Fibonacci series, Tower of Hanoi ,Lines in a plane Homogenous linear equations with constant coefficients, Particular Solution, Total Solution, Divide and Conquer Recurrence Relations (Fast Multiplication of Integers, Fast matrix Multiplication)	10
6	**Characteristics of Complex Business Problems**	Number of Possible Solutions, Time-Changing Environment, Problem-Specific Constraints, Multi-objective Problems, Modeling the Problem A Real-World Examples,	4
7	**MADM & MCDM**	Introduction to Multiple Attribute Decision-making (MADM) Multiple Attribute Decision-making Methods, Simple Additive Weighting (SAW) Method, Weighted Product Method (WPM), Analytic Hierarchy Process (AHP) Method, Entropy Method, Compromise Ranking Method (VIKOR), Weighted Average Method (WAM) Introduction to Multiple Criteria Decision Making (MCDM)	7

MCA L201	**Operating System and Computer Networks Lab (OS and CN Lab)**				**25**	**50**	**25**	**100**

Pre-requisites: Basic overview of Computer and Computer Networking principles.

Course Educational Objectives (CEO):

CEO 1	To study the various user level and administrator level commands in operating system.
CEO 2	To learn shell script and AWK programming.
CEO 3	To make the learner aware of the practical issues and various networking devices with their interconnections and configurations.
CEO 4	To equip the learner with a hands-on experience of designing various networking applications.

Course Outcomes: At the end of the course, the students will be able to :

MCAL201.1	Apply various operating system commands.
MCAL201.2	To write a shell script and awk programming.
MCAL201.3	Design network for any business requirement.

Syllabus :

Sr.No.	**Session**	**Contents**	**Hrs**
1	**Operating System Basics**	Installation of Operating System with configuration, Disk fragmentation & partitioning, Linux introduction and file system - Basic Features, Advantages, Installation requirements, Basic Architecture of Unix/Linux system, Kernel, Shell, System administration Commands	**4**

2	**Basic OS Commands**	Basic commands, Commands for files and directories cd, ls, cp, md, rm, mkdir, rmdir, more, less, Creating and viewing files using 'cat', File comparisons, View files. Essential Linux commands. Understanding shells, Processes in Linux-process fundamentals, connecting processes with pipes, Redirecting input output, manual help, Background processing, managing multiple processes, changing process priority, scheduling of processes at command, batch commands, kill, ps, who, sleep, Printing commands, find, wc, Cal, banner, touch, file, dd, Mathematical commands- bc, expr, factor, units. vi, vim editor	8
3	**Filter Commands**	Filter related commands-sort, grep, sed, head, tail, cut, paste, uniq Disk commands-disk related commands, checking disk free spaces	8
4	**Shell Programming**	Shell programming :- Shell programming, Basic of shell programming, Various types of shell, shell programming in bash, conditional and looping statements, case statements, parameter passing and arguments, Shell variables, shell keywords, Creating Shell programs for automate system tasks and report printing, use of grep in shell	8
5	**Advanced Shell Scripting**	Advanced Shell scripting-basic script functions, returning a value, using variables in functions, array and variable functions, function recursion, creating text menus	6
6	**Awk programming**	Study of gcc & basic Awk Programming-variables, expressions, built in variables , printf, storing in a file using -f option, comparison operator, BEGIN and END sections Awk Programming-arrays, functions, if statement, looping	8
7	**OS Security**	Securing Linux on a network-managing network services, controlling access to networks with nmap, implementing firewalls	4
8	**Introduction to packet tracer**	Study of Packet Tracer software interface, Basic Configuration of console, Router & Switches, Assigning IP v4 & IP v6 addresses to the interfaces of the routers, Subnetting /notation	4
9	**Routing Techniques**	Configure Static and default routing, RIPv2, EIGRP, OSPF	4
10	**Dynamic configuration**	Configuration of DCHP , Access List Configuration, Configuration of NAT, Static, Dynamic and PAT	6
11	**Authentication and VLAN**	Configuration of PPPoE (PAP, CHAP), Configure VLANs on the router, InterVLAN, Router on stick, multilayer VLAN, Spanning tree.	4
14	**Network Protocol**	Configure Telnet, DNS, HTTP, SMTP , FTP Servers, SNMP	4
15	**Mini Project**	A Mini – Project based on OS and CN using an integrated approach.(Maximum Two students in a Group)	10

MCAL202: Lab-II: Data Structure (DS) & Web Application Development using Open Source Tools Lab				25	50	25	100	

Pre-requisites: Basic understanding of fundamentals of any programming language and web technology

Course Educational Objectives (CEO):

CEO 1	To study various linear and non-linear data structures.
CEO 2	To provide knowledge for developing web applications using AJAX framework and open source tools.
CEO 3	To conceptualize effective storage mechanism for data and accessing it through web applications.

Course Outcomes: At the end of the course student will be able to

MCAL202.1	Effectively select the data structure model to be used for the real world problem.
MCAL202.2	Develop web based applications using AJAX framework and open source tools.
MCAL202.3	Build web application with effective storage mechanism for data.

Syllabus

Sr. No.	Session	Detailed Contents	Hours
1.	**Sorting**	Bubble Sort, Insertion Sort, Selection Sort, Shell Sort, Radix Sort	04
2.	**Searching**	Linear Search,Binary search	02
3.	**Stacks**	Array implementation, Linked List implementation, Evaluation of postfix expression	04

4.	Queue	Simple Queue, Linked List implementation of ordinary queue, Linked List implementation of circular queue, BFS, Linked List implementation of priority queue, Double ended queue	08
5.	Linked lists	Singly Linked Lists: Insert, Display, Delete, Search, Count, Reverse Circular Linked List: Insert, Display, Delete, Search, Count, Reverse Doubly Linked Lists : Insert, Display, Delete, Search, Count, Reverse	08
6.	Binary search trees	Insert, Recursive traversal: preorder, postorder, inorder, Search Largest Node, Smallest Node, Count number of nodes	08
7.	Heap	MinHeap: reheapUp, reheapDown, Delete, MaxHeap: reheapUp, reheapDown, Delete, HeapSort	04
8.	Hashing	Methods for Hashing: Direct, Subtraction. Modulo Division, Digit Extraction,Fold shift, Fold Boundary, Methods for Collision Resolution, Linear Probe	04
9.	Graphs	Represent a graph using the Adjacency Matrix, Find the shortest path in a graph using Warshall's Algorithm, Find the minimum spanning tree (using any method Kruskal's Algorithm or Prim's Algorithm)	04
10.	AJAX Framework	Making a Server Request, Loading HTML scriptlets from server, AJAX events, Making an AJAX Style File Upload.	04
11.	JavaScript	Client side scripting with JavaScript, variables, functions, conditions, Pop up boxes, Working with string, Numbers and arrays, Event handling in JavaScript, Working with forms elements, Validating form fields, Introduction to DOM	06
12.	Web Application Development using Bootstrap	Bootstrap - Introduction to Bootstrap, Bootstrap Grid System, Bootstrap Grid System - Advanced, Creating Layouts with Bootstrap, Bootstrap CSS - Understanding the CSS, CSS Customization / Skins, Responsive Web design with Bootstrap, Single Page Responsive site with Bootstrap, Bootstrap Plug-ins, Bootstrap Layout Components	06
13.	Web Application Development using Joomla	Joomla - Joomla fundamentals, Understanding the concept of Joomla Positions, Changing the layout structure by changing the module positio, Understanding Basic Joomla Template, Customizing Joomla Template, Building Custom Joomla Template, Linking CSS, Linking Javascript, Creating Custom Form, Changing the Form appearance using CSS	06
14.	Mini Project	A Mini – Project based on DS and WAD using an integrated approach.(Maximum Two students in a Group)	10

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
Basic Knowledge of data structures

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO301.1	Emphasize on basic concepts to organize, maintain and retrieve information from a DBMS.
CEO301.2	Cover the principles of database systems and recognize how they are used in developing data-intensive applications.
CEO301.3	To study an effective and efficient database system with the help of the rising trends of parallel and distributed databases.

Course Outcomes: At the end of the course, the students will be able to

MCA301.1	Understand various database concepts and apply them in real life applications.
MCA301.2	Determine the manner in which data can be stored, organized and manipulated in a database system.
MCA301.3	Apply various indexing and optimization techniques to process queries.
MCA301.4	Analyze and design database applications using suitable database techniques.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Overview of DBMS**	Overview of Database management System, File systems versus DBMS, Advantages of DBMS, View of data: Data Abstraction, Instances and Schemas, Data Models, Database Languages , Structure of DBMS, Role of DBA	06
2	**Database Design using ER Model and Relational Model**	**Overview of design process:** Entity Relationship Model, Constraints, Entity relationship Diagram, Entity Relationship Design Issues, Weak Entity Sets, Extended ER features **The Relational Model:** Concepts of Relational Models, Integrity Constraints over Relations, Enforcing Integrity Constraints, Querying Relational data, Logical Database Design: ER to Relational with Case Studies	06
3	**Normalization**	Informal Design Guidelines for Relational Schema, Functional Dependencies **Normal forms:** First, Second, Third Normal Form and BCNF.Introduction to De-normalization. Inference Rules for Functional Dependencies, Equivalence of Sets of Functional Dependencies, Minimal Set of Functional Dependencies, Properties of Relational Decomposition-Dependency Preservation, Lossless Join.	08
4	**Indexing**	**Overview of indexing**: Clustered Indexes, Primary and Secondary Indexes, Index Data Structures **Tree structured indexing**: Intuition for Tree Indexes, Indexed Sequential Access Methods, B+ Trees, Search, Insert, Delete, Duplicate **Hash Based Indexing**: Static Hashing, Extensible Hashing, Linear Hashing, Extensible Vs Linear Hashing	10
5	**Query Evaluation and** **Transaction Management**	Overview of Query Processing and Query Optimization, Query Evaluation Plans.Transaction Concepts, Transaction State, Implementation of Atomicity and Durability, Concurrent Executions, Serializability, Recoverability. **Concurrency Control**: Lock-Based Protocol, Timestamp-Based, Multi-version Schemes, Deadlock Handling **Recovery: F**ailure Classification, Log Based Recovery	10
6	**Parallel and distributed Databases**	**Parallel Databases:** Architecture for Parallel Databases, Parallel Query Evaluation **Distributed Databases:** Types of Distributed Databases, Distributed DBMS Architecture, Storing Data in a Distributed DBMS, Distributed Transaction, Distributed Concurrency Control, Distributed Recovery	08
7	**Object database systems**	Structured Data Types, Operations on Structured Data, Inheritance, Objects, Oids and Reference Types, Object oriented versus Object relational	04

Pre-requisites:
Basic understanding of any Object Oriented Programming Language.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO302.1	Understand fundamentals of object-oriented programming in Java.
CEO302.2	Study various Java programming constructs.
CEO302.3	Learn application development using Java Components.

Course Outcomes (CO): At the end of the course, the students will be able to

MCA302.1	Solve computational problems using basic constructs.
MCA302.2	Find a solution for real world problems using Java
MCA302.3	Develop Web Applications using Server Side Programming.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1.	**Fundamentals of Java Programming**	Features of Object-oriented Programming, History of Java, Features of Java, JVM Architecture, Differences between C++ and Java,Data types, variable, expressions, operators, control structures, arrays	03
2.	**Object and Classes**	Classes, Instance variables, Methods, Constructors, Access Specifiers, Abstract Classes and Wrapper Classes, Autoboxing and Unboxing, Inheritance, Polymorphism, Method Overriding, Use of Static, final, super and this keyword, Garbage collection and finalize method, string and mutable string, Inner Classes	04
3.	**Packages and Interfaces**	Package concept, Creating user defined package, Access control protection, Defining interface, Implementing interface.	02
4.	**Generics and Collections**	Generics - Generic Class, Creating Generic Classes, Generic Methods, Bounded Type, Collections- Collections and Generics, Collection Classes-Links, Vector, Linked Lists, Maps, HashMap, WildCards, LambdaExpressions - Lambda Type Inference, Lambda Parameters, Lambda Function Body, Returning a Value From a Lambda Expression, Lambdas as Objects	05
5.	**Exception Handling**	Exception handling fundamentals, Exception types, Exception as objects, Exception hierarchy, Exception Keywords - Try, catch, finally, throw, throws, Creating User defined Exceptions, Assertion, Annotations	04
6.	**Multi-threading**	Java thread model, Life Cycle of Thread, Working with Thread class and the Runnable interface, Thread priorities, ThreadGroup class, Inter thread communication, Synchronization.	04
7.	**File handling**	Input streams and Output streams, FileInputStream and FileOutputStream, Binary and Character streams, Buffered Reader/ Writer, Object serialization and Deserialization.	04
8.	**Event handling and GUI programming**	Comparison of AWT and SWING, Applet class, Applet API hierarchy , Life cycle of Applet, Delegation Event Model, Event handling mechanisms, Swing components, Swing Component Hierarchy- Basic and Advanced Components, JApplet, Layout managers, Adapter class, Inner class.	05
9.	**Database Programming**	JDBC architecture, Types of drivers, Java.sql package, Establishing connectivity and working with connection interface, Working with statement interface, Working with PreparedStatement interface, Working with ResultSet interface, Working with ResultSetMetaData interface.	05
10.	**Web development using Servlets**	Introduction to servlets, Servlet vs CGI, Servelet API overview, Servlet Life cycle, Generic servlet, HTTPServlet, ServletConfig, ServletContext, Handling HTTP Request and response –GET / POST method, request dispatching, Using cookies, Session tracking..	06
11.	**Web development using JSP**	Introduction to JSP, JSP Architecture, JSP Directives, JSP scripting elements, Default objects in JSP, JSP Actions, JSP with beans and JSP with Database, Error handling in JSP, Session	06

12.	**Introduction to Spring Frameworks**	tracking techniques in JSP, Introduction to custom tags, JSTL tags in detail	
		Introduction to Spring Framework, Spring Architecture, Spring Aspect of Object Oriented Concepts – Join Point and Point Cuts.	**04**

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any three from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name			Credits		
MCA303	**Information Security**			**04**		

Subject Code	Subject Name	Teaching Scheme			Credits Assigned			
		Theory	Pract.	Tut	Theory	Pract.	Tut	Total
MCA303	**Information Security**	**04**	**--**	**--**	**04**	**--**	**--**	**04**

		Theory Marks				TW	Pract.	Oral	Total
		Internal Assessment			End Semester Exam				
MCA 303	**Information Security**	Test1 (T1)	Test2(T2)	Average of T1 & T2					
		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
Computer Networks, Databases

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO303.1	Understand information assurance as practiced in computer operating systems, distributed systems, networks and representative applications.
CEO303.2	Study cryptography and key encryption techniques used today.
CEO303.3	Comprehend relevant security parameters in the internet, web, database systems and applications

Course Outcomes (CO): At the end of the course, the students will be able to

MCA303.1	Understand the requirement of information security and a clear understanding of its importance
MCA303.2	Be familiar with information security threats and countermeasures, and familiar with information security designs using available secure solutions
MCA303.3	Use the database security mechanisms, intrusion detection systems, formal models of security, cryptography, network ,web security

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction**	Principles of Security, Attacks, Services and Mechanisms, Integrity check, digital Signature, authentication.	03
2	**Cryptography**	Private Key Cryptography: Block Encryption, DES Algorithm, Problems with DES, Variations of DES, IDEA Algorithm, Uses of Secret key Cryptography; ECB, CBC, OFB, CFB Public Key Encryption : RSA Symmetric and Asymmetric Key Cryptography together	08
3	**Authentication**	Types of Authentication- Password-based authentication, address-based authentication, cryptographic authentication, smart cards, biometrics, mutual authentications, reflection attacks, Message Digest : MD5 ,SHA,MAC ,HMAC, Digital Certificate process, KDC-working, multi domain KDC, Kerberos	10
4	**Internet Security**	Transport Layer Security: SSL, SET Email Security : PGP, S/MIME, Comparison, IP security : IPSec, Web Services Security : XML, SOAP, WSDL and UDDI, SSl, WS-Security, SAML, Ws-Trust, WS-Security Policy	08
5	**Intrusion Prevention andDetection**:	Introduction, Intrusion Detection Systems , Prevention versus Detection, Types of Intrusion Detection systems, DOS attacks, Flooding Attacks, DdoS Attack Prevention/Detection, Defenses Against Denial-of-Service Attacks, Malware Detection	06
6	**Database Security**	The Need for Database Security, Database Access Control, Inference, Statistical Databases , Database Encryption,	05
7	**Firewalls**	Characteristics, Packet filters, Application Level Gateways, Circuit Level Gateways, Firewall Architectures, Trusted System,	06
8	**IEEE 802.11 Wireless LAN Security**	Background, Authentication: Pre- WEP Authentication, Authentication in WEP, Authentication and key agreement in 802.11i, Confidentiality and Integrity: Data protection in WEP, Data protection in TKIP and CCMP	06

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
> Basic knowledge of Mathematics and Statistics.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO304.1	Study formulation, analysis and solving science, engineering and business problems.
CEO304.2	Study mathematics and mathematical modelling using computers to forecast the implications of various choices.
CEO304.3	Study the selection of the best alternatives from the available choices.

Course Outcomes (CO): At the end of the course, the students will be able to

MCA304.1	Apply Operations research methodology to a broad range of problems in business and industry.
MCA304.2	Use mathematics and mathematical modelling using computers to forecast the implications of various choices.
MCA304.3	Solve optimization problems.
MCA304.4	Think of new methods for solving optimization problems.

Syllabus

Sr No	Module	Detailed Contents	Hrs
1	**Nature of Operation Research**	History ,Nature of Operation Research ,Impact of Operation Research, Application Areas	01
2	**Overview of Modeling Approach**	Formulating the problem, Constructing a mathematical model, Deriving a solution, Testing a model and the solution, Establishing control over the solution, Implementation issues	02
3	**Linear Programming**	Introduction ,Graphical solution, Graphical sensitivity analysis, The standard form of linear programming problems, Basic feasible solutions, Simplex algorithm, Artificial variables, Big M and two phase method, Solution to Problems based on Degeneracy, Alternative optima, Unbounded solution, Infeasible solutions.	12
4	**Dual Problem**	Relation between primal and dual problems, Dual simplex method, Sensitivity analysis.	05
5	**Transportation Problem**	Starting solutions. North-west corner Rule – least cost methods – Vogel's approximation method, MODI Method, Minimization and Maximization problem	05
6	**Assignment Problem &Travelling Salesman Problem**	Assignment Problem: Hungarian method (Minimization and Maximization) Traveling Salesman Problem: Branch & Bound technique, Hungarian method	05
7	**Sequencing Problem**	Two machines n jobs , three machines n jobs, n machines m jobs	03
8	PERT and CPM	Arrow network ,Time estimates, earliest expected time, latest allowable occurrence time, latest allowable occurrence time and slack time, Critical path, Probability of meeting scheduled date of completion of project, Calculation of CPM network ,Various floats for activities, Project crashing.	06
9	**Replacement Theory**	Replacement of items that deteriorate, Replacement of items that fail group replacement and individual replacement.	04
10	**Integer Programming**	Branch and Bound Algorithm, Cutting plane Algorithm	06
11	**Game Theory**	Two person Zero sum games, Solving simple games.	03

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
Students should have knowledge of Software Engineering theory.

Course Educational Objectives (CEO): At the end of the course, the students will be able to:

CEO305.1	Study importance of Software Testing in Software Development
CEO305.2	Explore appropriate Software Testing Techniques for finding bugs in Software.
CEO305.3	Study various Software Testing Tools and Quality Assurance Methods.

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA305.1	Solve the problems using Software Testing techniques and Approaches.
MCA305.2	Apply various Software testing Techniques to find bugs in software.
MCA305.3	Use open source software Testing Tools.
MCA305.4	Apply various Software Quality Assurance Techniques to ensure the quality in software.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Basics of Software Testing**	Humans, Errors & Testing, Correctness Vs Reliability, Testing & Debugging, Principles of Testing, Test Metrics	**04**
2	**Testing in the Software Life Cycle & Test Levels**	The General V-Model, W-Model, Component Test, Integration Test, System Test, Acceptance Test, Generic types of Testing- Functional, Non Functional, Testing software structure, Regression Testing	**08**
3	**Static Testing**	Structured Group Examinations - Reviews, Static Analysis - Control Flow Analysis & Data Flow Analysis, Tools for Static Testing	**04**
4	**Dynamic Analysis**	Black Box Testing- Equivalence Class Partitioning, Boundary Value Analysis, State Transition Test, Cause Effect Graphing and Decision Table Technique, User Documentation Testing, Domain Testing, White Box-Statement Coverage, Branch Coverage, Test of Conditions, Path Coverage	**08**
5	**Test Management**	Test Planning, Test Management, Test Process, Test Reporting, Incident Management – Test Log, Incident Reporting, Classification, Status	**08**
6	**Test Automation**	Design and Architecture for Automation, Test Automation-Design and Architecture for Automation, Generic Requirements for test Tool/Framework, Criteria for selecting test tools, Testing of Object Oriented Systems	**08**
7	**Software Quality**	Five Views of software quality, ISO 9126 Quality Characteristics, ISO 9000:2000 & Latest Software Quality Standards, SQA Planning: SQA plan, Organizational Level Initiatives.	**05**
8	**Software Measurement & Metrics**	Measurement during Software Life Cycle Context, Defect Metrics, Metrics for software Maintenance & Requirements, Measurement Principles, Case study for Identifying Appropriate Measures & Metrics for Projects	**07**

MCA L301	**Database Management systems and Software Testing Lab**	Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		--	--	--	--	25	50	25	100

Pre-requisites:
Basic Knowledge of SQL and Software Engineering concepts

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOL301.1	Make the students understand basic and relatively advanced issues in modern database management, information storage and retrieval.
CEOL301.2	Study various database techniques in developing data-intensive applications.
CEOL301.3	Explore the need of software testing in current industry scenario, understanding and knowledge of foundations, techniques and tools in area of software.
CEOL301.4	Understand the essential characteristics requirements and usage of Automation tools.

Course Outcomes (CO): At the end of the course, the students will be able to

MCAL301.1	Design database systems using available tools.
MCAL301.2	Develop applications using basic and modern database techniques as per organization requirements.
MCAL301.3	Demonstrate software testing tools
MCAL301.4	Create test design documents and test reports

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**DDL and DML**	**Data Definition Language:** Create, Alter, Drop, Rename, Truncate **Data Manipulation Language:** Insert, Update, Delete, Select	06
	Constraints	Not Null, Unique Key, Primary Key, Foreign Key, Check, adding and Dropping a Constraint	02
2	**Data Control Language and Transaction Control**	Grant, Revoke, Roles Commit, Rollback	02
3	**SQL SELECT Statements**	Column Alias, Concatenation Operator, Arithmetic Operators, ComparisonConditions, Logical Conditions, ORDER BY Clause	04
4	**Functions And Subquery**	Single Row Functions, Character Functions, Number Functions, Date Functions, Conversion Functions, Aggregate functions **Subquery:** Types of Subquery, Group by and Having Clause	06
5	**Joins and other concepts**	Equijoins, Non-Equijoins, Self Joins, Left Outer Joins, Right Outer Joins, Full Outer Joins, Natural Joins **Other Concepts:** View, Index	06
6	**PL/SQL Practical**	**Programming:** Variables, Identifiers, Comment, PL/SQL Block Structure **IF Statements:** Simple IF Statements, Compound IF Statements IF-THEN-ELSE Statements **Loop:** Basic Loop, WHILE Loop, FOR Loop	06
7	**Cursor and Trigger**	**Cursor:** Types of Cursor, Explicit Cursor Attributes **Trigger:** Trigger, Statement Trigger, Row Trigger, Using Conditional Operations.	06
8	**Functions, Procedures and packages**	Create Function, Function with Arguments, Executing Function, Dropping Function **Procedures:** Block Structure of Subprogram, Types of Subprograms, Procedurewith Parameters, Executing Procedures, Dropping Procedures **Packages:** Package Specification, Package Body, Creating Package, Execution,Dropping Package	06
9	**Parallel and distributed database**	**Implementation of different types of Partitions**: Range, Hash, List. **Distributed Database:** Horizontal, Vertical fragmentation	04
10	**Object Oriented database**	Implementation ofAbstract Data Type, Inheritance, Reference	04
11	**Manual Testing**	• Study of Reviews (Writing Test cases, Testing Framework, Test Document) • Construction of CFG & Deriving Test Cases • Implementation of Test Cases using Unit Testing, Integration & System Testing	04

12		• Implementation of Test Cases using Equivalence Class Partitioning, Boundary Value Analysis. • State Transition Test, Cause Effect Graphing and Decision Table Technique.	04
13	**Automation Testing**	• Study of Automation Tools. • Building Test Cases. • Using Base URL to Run Test Cases in Different Domains	06
14		• Selenium commands-selenese • Matching Text Patterns • Performance Testing Concepts :Load Testing, Stress Testing	06
15		• Web Driver Implicit & Explicit Wait • Cross Browser Testing • API Testing	06

Note: Automation software testing practical's can be performed using open source tool like selenium.

MCAL302	**Java Programming and Unified Modeling Language Lab**	**--**	**--**	**--**	**--**	**25**	**50**	**25**	**100**

Pre-requisites:
    Basic understanding of programming fundamentals and software engineering.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOL302.1	Understand, developing, testing and debugging Java programs.
CEOL302.2	Study UML tools
CEOL302.3	Explore object-oriented design using UML

Course Outcomes (CO): At the end of the course, the students will be able to:

MCAL302.1	Develop a simple software application using the object oriented approach.
MCAL302.2	Design and develop a Java Web Applications.
MCAL302.3	Apply UML tools for object oriented software modeling.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs.
1	**Fundamentals of Java Programming**	Program on creation of classes and using different types of function. Program using constructor/method overloading Program on passing Object as parameter to a function Program using static and final variable and methods	02
2	**Objects and Classes**	Program to perform different operations on Array and String Program using Interface and Inheritances. Program using Wrapper class to cover auto boxing and un boxing	04
3	**Packages and Interfaces**	Programs based on creating and using packages along with access control specification. Programs based on defining, creating and implementing interfaces.	04
4	**Generics, Collections and Lambda Expression**	Programs based on Generics, Collections and Lambda Expression	04
5	**Exception Handling**	Programs based on exception handling mechanism covering all keywords. Programs based on creating own exceptions.	04
6	**Multi-threading**	Programs based on Multithreading approach, thread priorities, Inter thread communication, and Synchronization.	04
7	**File Handling**	Programs based on Input streams and Output streams, FileInputStream and FileOutputStream, Binary and Character streams, Buffered Reader/ Writer, Object serialization and Deserialization.	04
8	**Event handling and GUI programming**	Programs based on designing GUI Interface. Programs based on creating an applets, use of containers, components, event handling, layout managers, Adapter classes, Inner class etc.	04
9	**Database Programming**	Programs based on database connectivity using MS-Access/ Oracle/ MySQL as a backend covering all the database operations.	04
10	**Web development using Servlets**	Programs based on handling request and response –GET / POST method, Programs based on cookies	04

		and Session tracking.	
11	**Web development using JSP**	Programs demonstrating JSP Syntax and semantics. Programs based on directives and error objects. Programs based on session tracking.	04
12	**Introduction to Spring Frameworks**	Basic programs based on Spring framework	03
13	**Introduction to UML**	UML Overview, The Nature and purpose of Models	01
14	**Modeling Requirements: Use Cases**	Capturing a System Requirement, Use Case Relationships, Use Case Overview Diagrams	02
15	**Modeling System Workflows: Activity Diagrams**	Activity Diagram Essentials, Activities and Actions, Decisions and Merges, Doing Multiple Tasks at the Same Time, Time Events, Objects, Sending and Receiving Signals, Starting an Activity, Ending Activities and Flows, Partitions (or Swimlanes), Managing Complex Activity Diagrams	02
16	**Modeling a System's Logical Structure: Introducing Classes and Class Diagrams Modeling a System's Logical Structure: Advanced Class Diagrams**	What is a Class?, Getting Started with Classes in UML, Visibility, Class State: Attributes, Class Behavior: Operations, Static Parts of Your Classes Class Relationships, Constraints, Abstract Classes, Interfaces, Templates	02
17	**Bringing Your Classes to Life: Object Diagrams**	Object Instances, Links, Binding Class Templates	01
18	**Modeling Ordered Interactions: Sequence Diagrams**	Participants in a Sequence Diagram, Time, Events, Signals, and Messages, Activation Bars, Nested Messages, Message Arrows, Bringing a Use Case to Life with a Sequence Diagram, Managing Complex Interactions with Sequence Fragments,	02
19	**Focusing on Interaction Links: Communication Diagrams** **Focusing on Interaction Timing: Timing Diagrams**	Participants, Links, and Messages, Fleshing out an Interaction with a Communication Diagrams, Communication Diagrams Versus Sequence Diagrams What Do Timing Diagrams Look Like?, Building a Timing Diagram from a Sequence Diagram, Applying Participants to a Timing Diagram, States, Time, A Participant's State-Line, Events and Messages, Timing Constraints	02

20	**Completing the Interaction Picture: Interaction Overview Diagrams**	The Parts of an Interaction Overview Diagram, Modeling a Use Case Using an Interaction Overview	01
21	**Managing and Reusing Your System's Parts: Component Diagrams**	What is a Component?, A Basic Component in UML, Provided and Required Interfaces of a Component, Showing Components Working Together, Classes That Realize a Component, Ports and Internal Structure, Black-Box and White-Box Component Views	02
22	**Modeling an Object's State: State Machine Diagrams**	Essentials, States, Transitions, States in Software, Advanced State Behavior, Composite States, Advanced Pseudostates, Signals, Protocol State Machines	02
23	**Modeling Your Deployed System: Deployment Diagrams**	Deploying a Simple System, Deployed Software: Artifacts, What Is a Node?, Hardware and Execution Environment Nodes, Communication Between Nodes, Deployment Specifications, When to Use a Deployment Diagram	02
24	**UML tools and techniques for web-based/object oriented Applications**	UML Tools, Different UML Notations for Web application	02
25	**Creation of documentation such as SRS, SDS from UML diagrams. Generation of code from UML model.**	Basic Concept, Generating by Templates, Using Batches, Installing and Uninstalling Templates	02
26	**Mini Project**	A Mini – Project based on Java Programming and UML using an integrated approach. (Maximum Two students in a Group).	10

Pre-requisites:

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOPR301.1	Conceptualize knowledge with emphasis on team work, effective communication, critical thinking and problem solving skills.
CEOPR301.2	Adapt to a rapidly changing environment by having learned and applied new skills and new technologies.
CEOPR301.3	Study designing small projects in a multidisciplinary environment.

Course Outcomes (CO): At the end of the course, the students will be able to

MCAPR301.1	Design, implement and evaluate a mini-project.
MCAPR301.2	Gain project management skills.
MCAPR301.3	Work effectively in small groups on medium scale computing projects.
MCAPR301.4	Demonstrate the ability to produce a technical document

Sample Guidelines for Preparing and Documenting the Project Report

Sr. No.	Module	Detailed Contents
1	**Introduction**	- Introduction of the project(SRS) - Problem definition - Objective of Project - scope of Project
2	**System Study**	- Existing System - Disadvantages of Existing system - Proposed System - Use Cases
3	**Analysis & Design**	- Software/hardware Requirement Specification - Software requirement - Hardware requirement - GANTT Chart - Flowchart/ DFD/ER/UML diagram(any other project diagram) - Module design and organization
4	**Testing & Validation**	Test cases and Report (based on manual & automation testing)
5	**User Manual**	- Explanation of Key functions - Method of Implementation - Forms - Output Screens
6	**Conclusion**	Project Conclusion & Future enhancement

- **Rubrics should be followed for evaluation.**

- **References for report documentation**
    1. Author Name, Title of Paper/ Book, Publisher's Name, Year of publication
    2. Full URL Address

** Mini Project will be performed by students during summer vacation of Even Semester of first year (SEM II) Mini project will be evaluated in SEM III. Evaluation of the mini project will be internal 25 marks as TW and 25 marks as oral examination conducted by External Examiner (Institute Level)

.

Mumbai University
(With Effect from 2017-2018)
Elective for Semester IV

SEM IV – Elective I

Course Code	Course Name
MCA4041	Entrepreneurship Management
MCA4042	Business Infrastructure and Management
MCA4043	ERP
MCA4044	Ethics and CSR

SEM IV – Elective II

Course Code	Course Name
MCA4051	Digital Forensics
MCA4052	Simulation and Modelling
MCA4053	Next Generation Networks
MCA4054	AI and Soft Computing

SEMESTER IV

Subject Code	Subject Name		Credits
MCA401	**Data Mining and Business Intelligence**		**04**

Subject Code	Subject Name	Teaching Scheme			Credits Assigned			
		Theory	Pract.	Tut	Theory	Pract.	Tut	Total
MCA 401	**Data Mining and Business Intelligence**	04	--	--	04	--	--	04

Subject Code	Subject Name	Examination Scheme							
		Theory Marks				TW	Pract.	Oral	Total
		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
MCA 401	**Data Mining and Business Intelligence**	20	20	20	80	--	--	--	100

Pre-requisites:
Basic knowledge of data base concepts

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO401.1	Acquire the knowledge of various concepts and tools behind data warehousing and mining data for business intelligence
CEO401.2	Study data mining algorithms, methods and tools
CEO401.3	Identify business applications of data mining

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA401.1	Use conceptualization of BI techniques
MCA401.2	Apply data warehouse concepts for data analysis and report generation
MCA401.3	Develop industry level data mining skills using software tools
MCA401.4	Make use of relevant theories, concepts and techniques to solve real-world BI problems

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Business Intelligence-**	Introduction and overview of BI-Effective and timely decisions, Data Information and knowledge, BI Architecture, Ethics and BI. BI Applications- Balanced score card, Fraud detection, Telecommunication Industry, Banking and finance, Market segmentation.	06
2	**Prediction methods and models for BI**	Data preparation, Prediction methods-Mathematical method, Distance methods, Logic method, heuristic method-local optimization technique, stochastic hill climber, evaluation of models	06
3	**BI using Data Warehousing**	Introduction to DW, DW architecture, ETL Process, Top-down and bottom-up approaches, characteristics and benefits of data mart, Difference between OLAP and OLTP. Dimensional analysis- Define cubes. Drill- down and roll- up – slice and dice or rotation, OLAP models- ROLAP and MOLAP. Define Schemas- Star, snowflake and fact constellations.	08
4	**Data Mining and Preprocessing**	Data mining- definition and functionalities, KDD Process, Data Cleaning: - Missing values, Noisy data, data integration and transformations. Data Reduction: - Data cube aggregation, dimensionality reduction- data compression, Numerosity reduction- discretization and concept hierarchy.	06
5	**Associations and Correlation**	Association rule mining:-support and confidence and frequent item sets, market basket analysis, Apriori algorithm, Incremental ARM, Associative classification- Rule Mining.	06
6	**Classification and Prediction**	Introduction, Classification methods:-Decision Tree- ID3, CART, Bayesian classification- Baye'stheorem(Naïve Bayesian classification),Linear and nonlinear regression.	08
7	**Clustering**	Introduction, categorization of Major, Clustering Methods:- partitioning methods- K-Means. Hierarchical- Agglomerative and divisive methods, Model- based- Expectation and Maximization.	08
8	**Web mining and Text mining**	Text data analysis and Information retrieval, text retrieval methods, dimensionality reduction for text. Web Mining: - web content, web structure, web usage.	04

- Data warehousing Fundamentals by PaulrajPonnian, John Willey
- Data mining for Business intelligence: concepts, techniques and applications in Microsoft Excel by G. Shumeli, N R Patel, P.C Bruce, Wiley

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any three from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name		Credits
MCA402	**Advanced Web Technologies**		**04**

Subject Code	Subject Name	Teaching Scheme			Credits Assigned			
		Theory	Pract.	Tut	Theory	Pract.	Tut	Total
MCA4 02	**Advanced Web Technologies**	**04**	**--**	**--**	**04**	**--**	**--**	**04**

Subject Code	Subject Name	Examination Scheme							
MCA 402	**Advanced Web Technologies**	Theory Marks				TW	Pract.	Oral	Total
		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	20	20	80	--	--	--	100

Pre-requisites:
- Basic Understanding of Object Oriented Programming
- Basic Understanding of Web Technologies

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO402.1	Study the architecture of Dot Net framework
CEO402.2	Understand the basic principles of C# development
CEO402.3	Learn advanced windows and web development techniques using dotNET

Course Outcomes (CO): At the end of the course, the students will be able to

MCA402.1	Create UI applications using C#
MCA402.2	Design and develop secure web applications using asp.net according to industry standards
MCA402.3	Define and create custom web services

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Dot Net and C#**	**Introduction to Dot Net Framework** Architecture of Dot NET Framework, CLR-Working and Features,CTS,CLS,Assemblies-Types,Structure and Metadata,GAC **C# Basics** Data Types(Value Types and Reference Types),Control Structures,Operators and Expressions, Arrays	08
2	**OOP C#**	**Classes and Objects** Instance Variables, Methods, Constructors, Properties, Access Specifiers,Static members and methods **Inheritance** Levels of Inheritance,Constructor and Inheritance,Polymorphism,Interfaces,Abstract classes,Delegates,Indexers,Sealed Classes,Exception handling **Collections and Generics** Bounded and Unbounded Collections,Generic Programming-Generic classes, Functions, Constraints on Generic Programming	10
3	**Databases and C#**	**File Handling** Text Files, Binary Files, String Processing, Serialization and Deserialization **ADO.Net** Connected and Disconnected,Architecture of ADO.Net,Commands,Datasets,Data Readers, Data Adapters,Working with Stored Procedures **LINQ and the ADO.NET EntityFramework** LINQ Introduction, Mapping Your Data Model to an Object Model, Introducing Query Syntax	08
4	**Asp.Net Web Applications**	Life cycle of Asp.Net web pages, Role of client side scripting, postback posting and cross page posting, asp.net compilation model, asp.net HTML Controls,Server Controls(basic controls,Calendar,AdRotator,FileUpload,ValidationControls	08
5	**Data and State Management in ASP.NET**	ASP.NET Websites with Themes and MasterPages, Data Source Controls, Data Bound Controls, ASP.NET State Management-Client Side and Server Side. ASP.NET and AJAX	10
6	**Web Services**	XML,Web Services Architecture, UDDI,SOAP and its Format,WSDL,Create and Consuming XML Web Service-Simple and Databases, WCF- Architecture,End Points, Types of Contracts, Web Applications and Security	08

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
    Basic Mathematics

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO403.1	Understand the concepts of output primitives of Computer Graphics.
CEO403.2	Learn 2 D and 3 D graphics Techniques.
CEO403.3	Study various Image Processing techniques

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA403.1	Demonstrate the algorithms to implement output primitives of Computer Graphics.
MCA403.2	Apply 2 D transformation techniques.
MCA403.3	Analyze 3 D transformation techniques.
MCA403.4	Apply image processing techniques.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Computer Graphics**	Introduction to Computer Graphics,Elements of Computer Graphics ,Graphics display systems.	02
2	**Output primitives & its Algorithms**	Points and Lines, Line Drawing algorithms :DDA line drawing algorithm, Bresenham's drawing algorithm ,Circle and Ellipse generating algorithms : Mid-point Circle algorithm ,Mid-point Ellipse algorithm ,Parametric Cubic Curves :Bezier curves .Fill area algorithms: Scan line polygon fill algorithm ,Inside-Outside Tests, Boundary fill algorithms, Flood fill algorithms	15
3	**2D Geometric Transformations & Clipping**	Basic transformations, Matrix representation and Homogeneous Coordinates, Composite transformation,shear & reflection. Transformation between coordinated systems. Window to Viewport coordinate transformation,Clipping operations – Point clipping Line clipping : Cohen – Sutherland line clipping, Midpoint subdivision,Polygon Clipping:Sutherland – Hodgeman polygon clipping ,Weiler – Atherton polygon clipping	12
4	**Basic 3D Concepts & Fractals**	3D object representation methods: B-REP, sweep representations, CSG, Basic transformations,Reflection,shear. Projections – Parallel and PerspectiveHalftone and Dithering technique. Fractals and self-similarity: Koch Curves/snowflake, Sirpenski Triangle	06
5	**Introduction to Image Processing**	Fundamental Steps in Digital Image Processing ,Components of an Image Processing System ,Basic Concepts in Sampling and Quantization, Representing Digital Images, Spatial and Gray-Level Resolution	05
6	**Image Enhancement Techniques**	Image Enhancement in the Spatial Domain: Some Basic Intensity Transformation Functions: Image Negatives, Log Transformations, and Power Law Transformations. Piecewise-Linear Transformation Functions: Contrast stretching, Gray-level slicing, Bit plane slicing. Introduction to Histogram, Image Histogram and Histogram Equalization, Image Subtraction, and Image Averaging	12

Elective Subjects

Elective-I
MCA404

Subject Code	Subject Name		Credits
MCA4041	**Entrepreneurship Management**		**04**

Subject Code	Subject Name	Teaching Scheme			Credits Assigned			
		Theory	Pract.	Tut	Theory	Pract.	Tut	Total
MCA4041	**Entrepreneurship Management**	**04**	**--**	**--**	**04**	**--**	**--**	**04**

Subject Code	Subject Name	Examination Scheme							
		Theory Marks				TW	Pract.	Oral	Total
		Internal Assessment			End Semester Exam				
MCA 4041	**Entrepreneurship Management**	Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
- Basic knowledge of Project Management & IT in Management.
- Knowledge of Financial Accounting & Management.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4041.1	Be familiar with Entrepreneurship basics, Skills and Qualities of Entrepreneurs.
CEO4041.2	Understand how to design effective and efficient Business Plan for intended users.
CEO4041.3	Understand and Learn various approaches for Woman Entrepreneurship, Business Management and Development.

Course Outcomes (CO): At the end of the course, the students will be able to

MCA4041.1	Understand the concepts and fundamentals of Entrepreneurship.
MCA4041.2	Analyse the process of Business Idea generation and converting the idea into a Business Model.
MCA4041.3	Identify the Role of Small Scale Industries (SSI) & Institutions Supporting Small Scale Enterprise.
MCA4041.4	Understand the exit strategies and Social Responsibilities.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Foundation of Entrepreneurship**	Concept, Meaning and Definition of Entrepreneur and Entrepreneurship, Importance and Significance of Growth of Entrepreneurial Activity, Concept of Entrepreneur, Traits, Characteristics, Skills and Qualities of Entrepreneurs, Classification and Types of Entrepreneurs, Entrepreneur vs Professional Manager.	08
2	**Creating and Starting the Venture**	**Business Idea:** New Business Idea, Pre-selection Process, Sources of Business Idea, Preliminary Research, Business Idea Evaluation, Other Analysis. **Business Plan:** Use of Business Plan, Creating a Business Plan, Types of Business Plan, Description of Business, Management Team, Marketing Plan, Finance, Risk and Contingencies.	10
3	**Small Business Enterprise**	Role of Small Scale Industries (SSI), Concept and Definition of Small Scale Industries, Government policy and Development of SSI in India, Growth and Performance of SSI in India, Problems for SSI. **Institutions Supporting Small Scale Enterprise**:Central Level, State Level and Other Agencies, Industry Association. **Setting up a Small Business Enterprise:** Identifying the Business Opportunity**,** Business Opportunity in **O**ther Sectors, Formulating of setting SSI.	14
4	**Women Entrepreneurship**	Women Entrepreneurship Defined, Environment, Challenges in the path of Women Entrepreneurship, Strategies for the Development of Women Entrepreneurship, Empowerment of Woman by Entrepreneurship, Grassroots Entrepreneurship through Self Help Groups (SHGs), Institutions supporting Women Entrepreneurship in India, Women Entrepreneurship in India, Case Studies of Successful Women Entrepreneurs.	08
5	**Growing and Managing the Venture**	Growth Strategies, Economic Implication of growth, Implications of Growth for the firm, Overcoming Pressures on existing Financial & Human Resources, Overcoming Pressures on Management of Employees & Entrepreneurs' Time, Implication of Firm Growth to the Entrepreneur.	06
6	**Exit Strategies and Social Responsibility**	Reasons for Existing, Long-Term Preparation, Short-Term Preparation, Introduction of Social Responsibility, Corporate Social Responsibility(CSR), Dimensions of CSR.	06

Pre-requisites:

Knowledge of Internet, Web and Network Systems

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4042.1	Study fundamentals of conducting business over the Internet
CEO4042.2	Familiarize with the Infrastructure, Ethics of electronic-business
CEO4042.3	Explore different kinds of business values and managing the change in digital market

Course Outcomes (CO): At the end of the course, the students will be able to

MCA4042.1	Adopt to transform traditional business into an e-business.
MCA4042.2	Identify the Infrastructure and Security issues related to e-business
MCA4042.3	Understand the current scenarios of digital world and applications of it

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**The world of E – Business**	What Is E-Business?, Characteristics Of E-Business, Categories Of E-Business (B2B, C2B, B2C, C2C), Elements Of E-Business, E-Business Roles And Challenges, E-Business Requirements, Impact Of E-Business, Inhibitors Of E-Business.	**04**
2	**E-business Strategies**	What Is E-Business Strategies, Strategic Positioning, Levels Of E-Business Strategies, The Changing Competitive Agenda: Business And Technology Drivers, The Strategic Planning Process, Strategic Alignment, The Consequences Of E – Business: Theoretical Foundations, Success Factors For Implementation Of E – Business Strategies.	**06**
3	**E-Business Models**	Pressure Forcing Business Changes, Business Models – Definition, Classification Of Business Models, Networked Business Models.	**06**
4	**The digital firm – Electronic business / Electronic commerce**	**Electronic Business, Electronic Commerce And The Emerging Digital Firm:** Internet Technology And The Digital Firm, New Business Models & Value Propositions **Electronic Commerce:** Categories Of Electronic Commerce, Customer – Centered Retailing, **Windows On Management:** Customer Communities Become Product Development Tools, B2B Electronic Commerce, New – Efficiencies And Relationships, **Window On Organization:**Covisint: The Vision And The Reality, E – Commerce Payment Systems. **Electronic Business & The Digital Firm:** How Intranets Support Electronic Business, Intranets & Group Collaboration, Intranet Applications For E – Business, Supply Chain Management & Collaborative Commerce. **Management Challenges And Opportunities:** Unproven Business Models, Business Process Change Requirements, Legal Issues, Trust, Security & Privacy, MIS In Action: Manager's Toolkit: Digitally Enabling The Enterprise: Top Questions To Ask, Make IT Your Business.	**10**
5	**Digital / Electronic Markets & Solutions**	Electronic Markets Defined, Functions Of Electronic Markets, How Do Electronic Markets Differ From Traditional Market?, Effects Of Electronic Markets, Electronic Market Success Factors, E – Market Technology Solutions.	**06**
6	**E-Business technological Infrastructure and Management**	Technical e-Business Challenges, Basic Infrastructure, Web Technologies and Application, Collaborative Technology, The role of enterprise Information Systems in e-Business. **The new IT Infrastructure for the Digital Firm:** Enterprise Networking and Internetworking, Standards and connectivity for the Digital Integration, Technology and Business Standards. **Support Technology for Electronic Business:** Web Server and Electronic Commerce servers, How to Integrate the wireless Web into Business strategy, Customer Tracking and Personalization Tools, Web content Management Tools, Web site Performance	**12**

| 7 | Ethical & Social Issues in the digital firm | **Understanding ethical and social issues related to systems:** Model For Thinking About Ethical, Social And Political Issue, Moral Dimensions Of The Information Age, Key Technology Trends That Raise Ethical Issue. **Ethics in an information society:** Basic Concepts:Responsibility, Accountability And Liability, MIS In Actions: Manager's Toolkit: How To Conduct An Ethical Analysis, Candidate Ethical Principles, Professional Codes Of Conduct, Some Real World Ethical Dilemmas. **The moral dimensions of information Systems:** Information Rights: Privacy & Freedom In The Internet Age, **Window On Organizations:** Privacy For Sale, Property Rights: Intellectual Property, Accountability, Liability And Control, System Quality: Data Quality And System Errors, Quality Of Life: Equity, Access And Boundaries, **Window On Management:** Alberta Narrows Its Digital Divide, Management Actions: Corporate Code Of Ethics, Make IT Your Business. | 08 |

Assessment:
Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests. Besides this, students in a group of 3 or 4 have to present a case study compulsorily related to electronic / digital Business likee-chaupal/e-governance /e-tourism/e-Learning/e-real estate/e-Media/ Impact of e-Business on society etc.

End Semester Theory Examination: Guidelines for setting up the question paper.
- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any three from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
Knowledge of Information Technology, Business System Management, Software and Networking

Course Educational Objectives (CEO): At the end of the course, the students will be able to

MCA4043.1	Study technical aspects of Enterprise Resource Planning (ERP) with its lifecycle.
MCA4043.2	Identify the functionality in an ERP system
MCA4043.3	Understand tools and methodology used for designing ERP for an Enterprise

Course Outcomes (CO): At the end of the course, the students will be able to

MCA4043.1	Conceptualize the basic structure of ERP
MCA4043.2	Identify implementation strategy used for ERP
MCA4043.3	Apply design principles for various business module in ERP
MCA4043.4	Apply different emerging technologies for implementation of ERP

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Enterprise Resource Planning (ERP)**	Information System and Its Components, Value Chain Framework, Organizational Functional Units, Evolution of ERP Systems, Role of ERP in Organization, Three-Tier Architecture of ERP system	08
2	**ERP Implementation Lifecycle**	Project Preparation, Initial Costing, Requirement Engineering, ERP Solution Selection, Technical Planning, Change Management and Training Plan, Implementation and Deployment Planning, Configuration, Custom Coding, Final Preparation, Go-live	08
3	**ERP and Related Technologies**	Business Processing Reengineering(BPR), Data Warehousing, Data Mining, On-line Analytical Processing(OLAP), Supply Chain Management (SCM), Customer Relationship Management(CRM), Electronic Data Interchange (EDI)	08
4	**ERP Manufacturing Perspective**	MRP - Material Requirement Planning, BOM - Bill Of Material, MRP - Manufacturing Resource Planning, DRP - Distributed Requirement Planning, PDM - Product Data Management	06
5	**ERP Modules**	Finance, Plant Maintenance, Quality Management, Materials Management,	08
6	**Benefits of ERP**	Reduction of Lead-Time, On-time Shipment, Reduction in Cycle Time, Improved Resource Utilization, Better Customer Satisfaction, Improved Supplier Performance, Increased Flexibility, Reduced Quality, Costs, Improved Information Accuracy and Design-making Capability	06
7	**Introduction to ERP tools**	OpenERP JD Edwards-Enterprise One Microsoft Dynamics-CRM Module SAP	08

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any four from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name		Credits
MCA4044	**Ethics & CSR**		**04**

		Theory	Pract.	Tut	Theory	Pract.	Tut	Total
MCA4044	**Ethics & CSR**	**04**	**--**	**--**	**04**	**--**	**--**	**04**

Subject Code	Subject Name	Examination Scheme							
		Theory Marks				TW	Pract	Oral	Total
		Internal Assessment			End Semester Exam				
MCA4044	**Ethics & CSR**	Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
 Basic knowledge of Organizational behavior& Corporate Governance

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4044.1	Acquire knowledge of Ethics in the modern era
CEO4044.2	Understanding of Ethical decision making approaches.
CEO4044.3	Understand the scope and complexity of Corporate Social responsibility in the global and Indian context.

Course Outcomes (CO): At the end of the course, the students will be able to

MCA4044.1	Understand ethical theories and ethics in profession.
MCA4044.2	Analyze global issues in ethics
MCA4044.3	Apply Ethical Code, Audit and living in real world.
MCA4044.4	Analyze Corporate Social Responsibility and its framework.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Basic Concepts in Ethics & Ethical Theories**	Introduction, Terminology, Personal Ethics, Professional Ethics, Life skills, Basic Ethical Principles, Moral Development,Theories-Piaget's Theory, Kohlberg's Theory, Elliot Turiel's Theory, Gilligan's Theory, Comparison of Moral Development Theories. Classification of Ethical Theories, Some basic Theories	10
2	**Global Issues in Ethics**	Introduction, Current Scenarios, Business Ethics, Environmental Ethics, Computer Ethics, Media Ethics, Bioethics, Research Ethics, Intellectual Property Rights, Professionals & Ethics.	08
3	**Ethical Codes**	Need for Ethical Codes, Sample codes, Codes from Other Professions, Corporate Codes, Implementation of codes, Limitations of codes.	08
4	**Ethics Audit & Ethical Living**	Need for Ethics audit, Ethics Profiles of Organizations, Considerations for Ethics Audit, Ethics standards and Benchmarking, Procedure for Ethics audit, Ethics audit Report.Ethical Living, Ethical living for Professionals.	08
5	**Understanding Corporate Social Responsibility (CSR), Evolutions of Company & CSR Role of various institutions in CSR**	Introduction, Understanding CSR, History of CSR in India. Theories of corporate Governance, Importance of CSR in Corporate Governance, The Social Impact. Introduction, Role of Government, Role of NGO'S & Not-for-profit Organizations, Role of Educational Institutions, Role of the Media.	10
6	**Framework for rating CSR & Global CSR.**	Understanding CSR ratings, available Accepted Rating Frameworks, Structure of BITC CR Index, Rating Criteria and basic structure of the rating process. Study of Sample Rating Framework for Corporate. Multinational companies, challenges of multinationals, country specific CSR Initiatives.	08

Elective-II
MCA405

Subject Code	Subject Name		Credits	
MCA4051	**Digital Forensics**		**04**	

Subject Code	Subject Name	Teaching Scheme			Credits Assigned			
		Theory	Pract.	Tut	Theory	Pract.	Tut	Total
MCA4051	**Digital Forensics**	**04**	**--**	**--**	**04**	**--**	**--**	**04**

Subject Code	Subject Name	Examination Scheme							
		Theory Marks				TW	Pract	Oral	Total
		Internal Assessment			End Semester Exam				
MCA 4051	**Digital Forensics**	Test1 (T1)	Test2 (T2)	Average of T1 & T2					
		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
Information Security

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4051.1	Understand the fundamental of forensics
CEO4051.2	Have in depth knowledge of relationship between IT and Forensics
CEO4051.3	Study different aspects of digital evidences

Course Outcomes: At the end of the course, the students will be able to:

MCA4051.1	Develop computer forensic awareness
MCA4051.2	Utilizing the knowledge for investigations in order to solve computer crime
MCA4051.3	Perform best practices for incidence response
MCA4051.4	Apply computer forensic tools for investigation

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction**	Introduction of Cyber Crime, Computer roles in Crime, Introduction to Digital Forensics and its uses. Forensics Evidence, Collection, Processing and the phases of forensics investigation, Types of Computer Forensics	06
2	**Data Recovery**	Encryption and Decryption, Recovery deleted files, Identifying false images and Steganography methods for media data including text, image and audio data	08
3	**Digital Evidence Controls**	Uncovering attacks that evade detection by event viewer and task manager. Memory image acquisition techniques and their limitations	08
4	**Network Forensics**	Different attacks in network, collecting and analyzing network based evidence in windows and Unix environment, Email forensics for standard protocols	06
5	**Mobile Phone and Android Forensics**	Crime and mobile phones, evidences, forensic procedures, files present in SIM Card, Device data, External memory dump and evidences in memory card, Android forensic fundamental, Data extraction techniques, screen lock bypassing techniques	08
6	**Cloud Forensics**	Fundamentals of cloud forensics, Cloud crimes, Uses of cloud forensics and its challenges, Interaction of Email system with local and cloud storage	08
7	**Real forensic Case and Its Tools**	Processing a complete forensic case and preparing a forensic report and Introduction of some forensic tools- Helix, FTK, Autopsy and FIRE	08

MCA4052	**Simulation and Modelling**	**04**	**--**	**--**	**04**	**--**	**--**	**04**

Subject Code	Subject Name	Examination Scheme							
		Theory Marks				TW	Pract	Oral	Total
		Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2 (T2)	Average of (T1 & T20					
MCA 4052	**Simulation and Modelling**	20	20	20	80	--	--	--	100

Pre-requisites:
Overview of Probability, Statistics and Discrete Mathematics and basics of Computers.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4052.1	Understand the basic system concepts and definitions of the types of system.
CEO4052.2	Provides techniques to model and simulate each system.
CEO4052.3	Ability to analyze the system and make use of information to improve its performance.

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA4052.1	Apply functional modeling to model the activities of a static system.
MCA4052.2	Understand the behavior of a dynamic system and create a model for a dynamic system.
MCA4052.3	Simulate the real systems

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Simulation**	What is modeling and Simulation: History, Application areas, Advantages and Disadvantages, Role of modeling and simulation for Problem solving, Types of simulation models and examples: static (Monte Carlo simulation and its application to industries), dynamic (Bank), deterministic (arrivals at scheduled appointment time), stochastic (random arrivals and service time), Discrete event simulation (queuing system), continuous (communication and traffic system). Steps in simulation study. Uses of simulation with examples(Experimentation, experience, ethics, human interaction).	04
2	**Description and solutions of simulation examples**	Simulation of Queuing system (G/G/1, D/D/1 ,…, M/G/1, M/M/1) characteristics, notation, Measures of performance of Queuing system, example of single channel of Queue, the Able Baker call center problem.Simulation of inventory system (News Paper seller problem), Other examples: Reliability problem, Use of random normal numbers for simulation, project simulation, Lead Time Demand, Job Shop Model.	12
3	**Simulation Models using Random Numbers and Variates**	Simulation Examples based on statistical distributions. Discrete distributions, Continuous distributions, Poisson process.Random- Number Generation: Properties of Random Numbers, Generation of Pseudo- Random Numbers, Techniques for Generating Random Numbers, Tests for Random Numbers. Random Variate Generation:Inverse Transformation Technique –Uniform Distribution, Exponential Distribution, Weibull Distribution. Convolution Method for Erlang Distribution, Acceptance-Rejection Technique – Poisson Distribution.	12
4	**Input and Output Analysis**	**Input Models with Data:** Data Collection, Identifying the Distribution with Data - Parameter Estimation, Goodness of Fit Tests: Chi-Square Test, Kolmogorov-Smirnov Test. Selecting Input Models without Data , Time-Series Input Models **Output Analysis:** Stochastic Nature of Output Data - Types of Simulation with respect to Output Analysis- Measures of Performance and their Estimation (Point Estimation, confidence Interval Estimation). Output Analysis for Terminating Simulations (Confidence Interval Estimation)Output Analysis for Steady-State Simulation.(Error estimation)	12
5	**Verification and Validation**	Model Building, Verification and Validation; Verification of Simulation Models - Calibration and Validation of Models:- Face Validity, Validation of Model Assumptions, Validating Input-Output Transformations - Input-Output Validation using Historical Input Data, Input-Output . Validation using a Turing	06

		Test. Optimization via simulation examples.	
6	**Modelling and Simulation of Real World Problems**	Simulation of manufacturing systems, Simulation of computer systems, Simulation of supermarket. Simulation of Transportation model, business model, Medical models, Social Science models.	06

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
   Computer Networks

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4053.1	Relate the paradigm shift from circuit switched network to packet switched network.
CEO4053.2	Understand the core technologies, and architectures of the Next Generation Networks
CEO4053.3	Summarize technology options for Multi-Service Networks

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA4053.1	Evaluate the importance of packet switching for NGN
MCA4053.2	Analyze and differentiate various architectures of a next generation network (NGN)
MCA4053.3	Comprehend the multiple services offered by NGN

Syllabus

Sr. No	Module	Detailed Contents	Hrs
1	**Introduction**	Changes, Opportunities and Challenges, Technologies, Networks, and Services, Requirements for NGN, Next Generation Network Concept, Next Generation Society	08
2	**Next Generation Technology**	Technologies influencing change, IP Networks (Migration from circuit Switching to Packet Switching), building blocks for NGN, Wireline NG Technologies: Fiber to Premises, Long-Haul Managed Ethernet, Wireless NG Technologies: Broadband Bluetooth & ZigBee, Long Term Evolution, VOIP, Multi service Flexible Networks architecture. VPNs, ITU - NGN Architecture, Numbering, naming and addressing in NGN	10
3	**IMS and Convergence Management**	IMS Architecture, IMS Services : Push to Talk over cellular Service , IMS Based FMC Services	08
4	**IPTV &HbbTV**	Introduction, Architecture of NGN Based IPTV, NGN Based IPTV Services, Protocols Used for IPTV, HbbTV (Hybrid Broadcast Broadband TV) Services, HBB–NEXT, Multiple-User Environment	08
5	**Next Generation Multiservice Technology**	MPLS , MPLS services and components , MPLS &QoS, overview of VPN, layer2 VPN, layer 3 VPN	08
6	**NGN Services**	Software- Based Business Services, High- Definition Voices, Three Dimensional Television, Mobile and Manages Peer-to Peer Service, Converged/ Personalized / Interactive Multimedia Services, Grand-Separation for Pay-per-Use Service, Consumer and Business-Oriented Apps Storefront	10

MCA 4054	**Artificial Intelligence and Soft Computing**	**20**	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
Students should have knowledge of SET theory, SET relations and Probability.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO4054.1	Identify and describe problems that are amenable to solution by AI methods.
CEO4054.2	Study appropriate soft computing techniques for problem solving
CEO4054.3	Study optimization techniques based on soft computing approach

Course Outcomes (CO): At the end of the course, the students will be able to

MCA4054.1	Understand various AI concepts
MCA4054.2	Solve the problems using neural networks techniques.
MCA4054.3	Apply fuzzy logic techniques to find solution of uncertain problems.
MCA4054.4	Analyze the genetic algorithms and their applications

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	Introduction to AI	**Artificial Intelligence** : Role of AI in engineering, AI in daily life, Intelligence and Artificial Intelligence, Different task domains of AI, Programming methods, Limitations of AI **Intelligent Agent:** Agent, Performance Evaluation, task environment of agent, Agent classification, Agent architecture	05
2	Problem Solving	**Problems, problem spaces and search:** Define the problem as a state space search, Production systems, Problem characteristics, Production system characteristic, Issues in design of search program **Search Techniques:** DFS, BFS, Hill Climbing	06
3	Knowledge Representation	**Knowledge Representation**: Need to represent knowledge, Knowledge representation with mapping scheme, Properties of good knowledge-based system, Knowledge representation issues, AND-OR graph, Types of knowledge	09
4	Concepts of Soft Computing	**Soft Computing:** Hard computing Vs Soft Computing, Soft computing constituents – ANN, Fuzzy Logic, GA Applications of Soft Computing	02
5	Neural Network	**Artificial Neural Network:** Introduction,Fundamental Concept, Artificial Neural Network, Brain vs. Computer - Comparison Between Biological Neuron and Artificial Neuron, Basic Models of Artificial Neural Network **Supervised Learning Network-**Linear Separability, Perceptron Networks, Adaptive Linear Neuron (Adaline), Multiple Adaptive Linear Neurons, Back-Propagation Network. **Unsupervised Learning Networks-** MaxNet	12
6	Fuzzy Logic	**Introduction to Fuzzy Logic, Classical Sets and Fuzzy Sets:**Introduction to Fuzzy Logic, Classical Sets (Crisp Sets),Fuzzy Sets **Classical Relations and Fuzzy Relations:** Introduction, Cartesian Product of Relation, Classical Relation, Fuzzy Relations **Membership Functions:** Introduction, Features of the Membership Functions, Fuzzification, Methods of Membership Value Assignments **Defuzzification:** Introduction, Lambda-Cuts for Fuzzy Sets (Alpha-Cuts), Lambda-Cuts for Fuzzy Relations, Defuzzification Methods	10
7	Fuzzy Inference System	**Fuzzy Inference System**: Truth Values and Tables in Fuzzy Logic, Fuzzy Propositions, Formation of Rules, Decomposition of Rules (Compound Rules), Aggregation of Fuzzy Rules, Fuzzy Inference Systems (FIS)- Construction and Working Principle of FIS, Methods of FIS, Overview of Fuzzy Expert System	04
8	Genetic Algorithm	**Genetic Algorithm**: Basic concepts, Difference between genetic algorithm and traditional methods, Simple genetic algorithm, Working principle, Procedures of GA, Genetic operators-reproduction, Mutation, crossover.	04

MCAL401	**Advanced Web Technology and Data Mining and Business Intelligence Lab**	--	--	--	--	25	50	25	100

Pre-requisites:
- Basic Knowledge of Object Oriented Programming concepts
- Basic Understanding of Database Systems

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOL401.1	Learn advanced windows and web development techniques using dotNET
CEOL401.2	Understand Business Intelligence and Data Mining techniques
CEOL401.3	Prepare Business Intelligence applications using Web Technologies.

Course Outcomes (CO): At the end of the course, the students will be able to:

MCAL401.1	Develop Windows forms applications and Web Applications using Dot NET Technologies
MCAL401.2	Apply Data warehousing and mining techniques.
MCAL401.3	Design and implement web enabled BI application for industry.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Dot Net and C#**	• Basic Windows Forms Applications • Windows Forms Applications using Control Structures and Operators • Advanced Windows Forms Controls	**04**
2	**OOP C#**	• Programs using Classes and Objects • Programs based on Inheritance • Programs using Static and Constant • Programs using Interfaces • Programs using Abstract Classes • Programs on Collections • Designing Generic Classes and Methods	**10**
3	**Databases and C#**	• Text File Handling • Text Editing Application • Binary File Handling • Database Connectivity in Connected Manner • Database Connectivity in Disconnected Manner • LINQ with Object Data Source • LINQ with DataSet	**08**
4	**Asp.Net Web Applications**	• Web Applications using Web Server Controls • Web Applications using advanced Web Server Controls • ASP .NET Applications using Web Forms • ASP.NET Applications using MVC	**08**
5	**Data and State Management in ASP.NET**	• ASP.Net Web Applications managing States • Web Applications using SQL Data Source • Web Applications using Connected and Disconnected database Connectivity • Web Applications using ADO.NET Entity Framework • Web Applications using jquery and database Connectivity • Web Applications using ASP.NET Ajax • Websites using Master Pages and Themes	**10**
6	**Web Services**	• Creating and Consuming a XML Web Service-Simple and Database • Creating and Consuming a WCF service – Simple and Database • Designing Secure Web Application • Deploying web Site	**06**
7	**Data Warehousing**	**Data Warehousing using Oracle** • Setting Up and Starting Warehouse Builder • Introducing OWB Architecture and Configuration • Defining Source Metadata • Ensuring Data Quality Using Data Profiling • Defining Staging Metadata and Mapping Tables • Deriving Data Rules and Running Correction Mappings	**06**

		• Defining a Relational Dimensional Model • Handling Slowly Changing Dimensions **OLAP with Oracle** • Analytical Queries • Grouping Functions • Windowing Functions • RollUp and Cube	
8	**Data Mining**	**Data Mining Using Weka/R Miner** • Introducing Weka/R Miner • The Data Mining Process • Using Classification Models • Using Regression Models • Using Clustering Models • Performing Market Basket Analysis • Performing Anomaly Detection • Deploying Data Mining Results	**08**
9	**BI Tools**	**Open Source BI Tools** • Preparing Reports • Preparing Dashboards • Preparing Balanced ScoreCards • Analysis of Reports	**08**
10	**Mini Project**	**Mini Project** A Mini Projects based on Data Mining and Business Intelligence Techniques using advanced Web Technologies.	**10**

Pre-requisites:
- Understanding of Object Oriented Programming Language
- Knowledge of Algorithms

Course Educational Objectives (CEO): At the end of the course, the students will be able to:

CEOL402.1	Understand the concepts of output primitives of Computer Graphics.
CEOL402.2	Learn 2 D and 3 D graphics Techniques.
CEOL402.3	Study various Image Processing techniques

Course Outcomes (CO): At the end of the course, the students will be able to:

MCAL402.1	Implement the algorithms to draw output primitives of Computer Graphics.
MCAL402.2	Implement 2D transformations
MCAL402.3	Implement 3D transformations
MCAL402.4	Implement various image processing techniques.

Syllabus:

Sr. no	Module	Detailed Contents	Hours
01	**Introduction**	Introduction to graphics coordinates system and demonstration of simple inbuilt graphic functions	2
02	**Output primitives & its Algorithms**	Implementation of line generation A. A. DDA line B. Bresenhams line C. application of Line drawing algos.	6
03	**Output primitives & its Algorithms**	Implementation of circle drawing A. Midpoint circle B. application of Circle drawing algos.	4
04	**Output primitives & its Algorithms**	Implementation of ellipse drawing A. Midpoint Ellipse	4
05	**Output primitives & its Algorithms**	Implementation of curve drawing A. Bezier Curve	2
06	**Output primitives & its Algorithms**	Implementation of filling algorithms A. Boundary fill B. Flood fill C. Scan line D. application of Circle drawing algos.	8
07	**2D Geometric Transformations & Clipping**	Implementation of two dimensional transformations A. Translation, Rotation & Scaling B. Shear & Reflection	6
08	**2D Geometric Transformations & Clipping**	Implementation of clipping algorithms A. Cohen Sutherland Line clipping B. Midpoint Subdivision C. Sutherland Hodgeman Polygon Clipping	10
09	**Basic 3D Concepts & Fractals**	Implementation of 3D Transformations (only coordinates calculation)	2
10	**Basic 3D Concepts & Fractals**	Implementation of fractal generation A. Koch curve/Snowflake B. Sirepenski Triangle	6
11	**Introduction of Animation**	Implementation of animation programs (using basic inbuilt Graphical functions)	4
12	**Image Enhancement Techniques**	Implementation of Basic Intensity Transformations A. Image negative B. Log transformation C. Power law Transformation	6
13	**Image Enhancement Techniques**	Implementation of Piecewise-Linear Transformation Functions A. Contrast Stretching B. Grey level Slicing C. Bit plane slicing	8
14	**Image Enhancement Techniques**	Implementation of histogram equalization A. Image histogram & histogram	10

		Equalization B. Image Subtraction C. Image averaging

Pre-requisites: ----

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOL403.1	To provide essential professional skills needed to make a positive impact on work and social lives
CEOL403.2	Understand the corporate culture and adapt to various situations
CEOL403.3	Improve their etiquettes, interpersonal skills and professional image

Course Outcomes (CO): At the end of the course, the students will be able to

MCAL403.1	Develop skills in communication, business correspondence, presentations, group discussions and interviews
MCAL403.2	Apply valuable strategies and interpersonal skills thereby making themselves more productive and better capable to lead others
MCAL403.3	Understand the importance of teamwork and learn to perform to the best of their ability, both individually and as team players

Syllabus

Sr. No	Module	Detailed Contents	Hrs
1	**Soft Skills Introduction**	Soft-Skills Introduction What are Soft Skills? Significance of Soft-Skills – Soft-Skills Vs. Hard Skills - Selling Soft- Skills – Components of Soft Skills – Identifying and Exhibiting Soft-Skills	01
2	**Communication**	Concept and meaning of communication, methods of communication, verbal and non-verbal communication, barriers to communication, techniques to improve communication. Communication in a business organization: Internal (Upward, Downward, Horizontal, Grapevine). External Communication, 7 C's of communication. Active Listening, Differences between Listening and Hearing, Critical Listening, Barriers to Active Listening, Improving Listening Practical (Role plays, case studies)	02
3	**Written Business Communication**	Written Communication: Principles of Correspondence, language and style in official letter (full block format, modified block format), Business letters (enquiry to complaints and redressal), Application letter, CV writing, , E-mail etiquette, Documentation of Meetings, Notice, Agenda, Minutes of Meetings. Practical (Practice on CV, Business Letters, Applications, Notice, Agenda, Minutes of Meetings)	04
4	**Presentation Skills**	Presentation techniques, Planning the presentation, Structure of presentation, Preparation, Evidence and Research, Delivering the presentation, handling questions, Time management. Visual aids. Practical - Presentation by students in groups of maximum 3 on Organizational Behavior topics allocated by faculty. Topics have to cover – 1. Personality: Meaning, Personality Determinants, Traits, Personality types and its, impact on career growth, 2. Personality and Values, Perception and Individual Decision Making. 3. Diversity in Organizations 4. Attitude: Meaning, Components of Attitude, changing attitude and its impact on career growth 5. Motivation 6. Goal setting: SMART (Specific, Measurable, Attainable, Realistic, Timely) Goals, personal and professional goals 7. Time Management. 8. Learning in a group, Understanding Work Teams, Dynamics of Group Behavior, Techniques for effective participation 9. Leadership 10. Emotional intelligence	10
5	**Effective Public Speaking**	Public Speaking, Selecting the topic for public speaking, Understanding the audience, Organizing the main ideas, Language and Style choice in the speech, Delivering the speech Practical (Extempore)	03
6	**Group Discussions**	Group Discussion Skills, Evaluation components, Do's and Don'ts. Practical (Group Discussions)	03
7	**Interview**	Interview Techniques, Pre-Interview Preparation, Conduct during	03

	Techniques	interview, Verbal and non-verbal communication, common mistakes. Practical (Role plays, mock interviews)	

Reference:
- Business Communication (Revised Edition),Rai& Rai , Himalaya Publishing House.
- Soft skills: an integrated approach to maximise Personality, Chauhan &Sharma,Wiley India publications.
- Business Communication: A practice oriented approach, Kalia and Shailja Agarwal.

- Stephen Robbins & Judge Timothy: Organization Behavior, Pearson Education
- K. Aswathappa – Organizational Behavior: Text, cases & games, Himalaya Publishing House.
- Pareek, Udai, Understanding Organizational Behaviour, Oxford University Press, New Delhi.

Assessment:

Internal:
Internal term workwould consist of
1. A written examination of 20 marks
2. Continuous evaluation of 30 marks would be done by internal faculty on the basis of student participation in all practical activities during entire semester.

Pre-requisites:
 Basic knowledge of networks and communication

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO501.1	Learn the concepts of wireless communication and mobile networks
CEO501.2	Identify different wireless technologies and its applications
CEO501.3	Acquire knowledge on generation of cellular networks and its standards used

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA501.1	Understand the concept of cellular communications, advantages and its limitations
MCA501.2	Compare the various wireless technologies and its applications
MCA501.3	Apply the appropriate technology in the applications

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Wireless Technology Fundamentals**	Introduction to Mobile and wireless communications, Overview of radio transmission frequencies, Signal Antennas, Signal Propagation, Multiplexing – SDM,FDM, TDM,CDM, Modulation – ASK,FSK,PSK, Advanced FSK, Advanced PSK, OFDM, Spread Spectrum – DSSS,FHSS, Wireless Transmission Impairments – Free Space Loss, Fading, Multipath Propagation, Atmospheric Absorption, Error Correction – Reed Solomon, BCH, Hamming code, Convolution Code (Encoding and Decoding)	08
2	**Wireless Networks**	Wireless network, Wireless network Architecture, Classification of wireless networks – WBAN, WPAN, WLAN, WMAN, WWAN. IEEE 802.11, IEEE 802.16, Bluetooth – Standards, Architecture and Services	06
3	**Cellular wireless Networks**	Principles of cellular networks – cellular network organization, operation of cellular systems, Handoff. Generation of cellular networks – 1G, 2G, 2.5G, 3G and 4G.	06
4	**Mobile communication systems**	GSM – Architecture, Air Interface, Multiple Access Scheme, Channel Organization, Call Setup Procedure, Protocol Signaling, Handover, Security, GPRS – Architecture, GPRS signaling, Mobility management, GPRS roaming, network, CDMA2000-Introduction, Layering Structure, Channels,Logical Channels, Forward Link and Reverse link physical channels, W-CDMA – Physical Layers, Channels, UMTS – Network Architecture, Interfaces, Network Evolution, Release 5, FDD and TDD, Time Slots, Protocol Architecture, Bearer Model Introduction to LTE	12
5	**Mobile Network Layer**	Mobile IP – Dynamic Host Configuration Protocol, Mobile Ad Hoc Routing Protocols– Multicast routing	06
6	**Mobile Transport Layer**	TCP over Wireless Networks – Indirect TCP – Snooping TCP – Mobile TCP – Fast Retransmit / Fast Recovery Transmission/Timeout Freezing-Selective Retransmission – Transaction Oriented TCP , TCP over 2.5 / 3G wireless Networks	07
7	**Application Layer**	WAP Model- Mobile Location based services -WAP Gateway – WAP protocols – WAP user agent profile, Caching model-wireless bearers for WAP - WML – WMLScripts – WTA.	07

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any three from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name	Credits

		20	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
 Computer Networks, Operating Systems

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO502.1	Introduce advance distributed concepts.
CEO502.2	Emphasize on design techniques and constraints of distributed computing
CEO502.3	Emphasize on analysis of cloud computing, its security and its storage

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA502.1	Distinguish between distributed computing and parallel computing
MCA502.2	Understand concepts of SOA.
MCA502.3	Demonstrate different cloud technologies
MCA502.4	Designing security and storage in cloud technologies.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Distributed Computing Concepts**	Basic concepts of distributed systems, distributed computing models, software concepts, issues in designing distributed systems, client server model **Inter Process Communication** Fundamental concepts related to inter process communication including messagepassing mechanism, a case study on IPC in MACH, concepts of group communication and case study of group communication CBCAST in ISIS, API for Internet Protocol. **Remote Communication** Remote Procedural Call (RPC), Remote Method Invocation (RMI),a case study on Sun RPC, a case study on JAVA RMI.	11
2	**Clock synchronization**	Introduction ofclock synchronization, global state mutual Exclusion algorithms, election algorithms.	02
3	**Distributed Shared Memory**	Fundamental concepts of DSM, types of DSM, various hardware DSM systems, Consistency models, issues in designing and implementing DSM systems.	06
4	**Distributed System Management and Object based System**	Resource management, process management, fault tolerance, code migration, CORBA: Overview of CORBA, Communication, Processes, Naming, and Synchronization.	09
5	**Introduction to Parallel Computing**	Parallel computing, scope of parallel computing, Abstract model of serial & parallel computation, pipelining, data parallelism, control parallelism, scalability, topologies in processor organization, parallel computing design consideration, parallel algorithms & parallel architectures, applications of parallel computing.	08
6	**Advances in Distributed Computing**	Service-Oriented Architecture, Elements of Service-Oriented Architectures, RPC versus Document Orientation, Major Benefits of Service- Oriented Computing, Composing Services, Goals of Composition, Challenges for Composition, Spirit of the Approach.	04
7	**Fundamentals of Cloud computing, cloud Security and Storage**	Evolution of Cloud Computing ,cluster computing Grid computing, Grid computing versus Cloud Computing, Key Characteristics of cloud computing. **Cloud models:** Benefits of Cloud models, Public Cloud, Private Cloud, Hybrid Cloud, Community Cloud, Shared Private Cloud, Dedicated Private Cloud, Dynamic Private Cloud, Savings and cost impact, Web services delivered from cloud, Platform as a service, Software as a service,Infrastructure as a service. **Cloud Security Fundamentals and Storage** Privacy and security in cloud, Security architecture, Data security, Identity and access management, security challenges, Storage basics, Storage as a service providers, aspects of data security.	12

Pre-requisites:
System Analysis & Design,Software Engineering and Project Management,UML.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO503.1	Develop interest in User Experience Engineering (UXE) Process
CEO503.2	Understand how to design Effective and Efficient User Interfaces for intended users
CEO503.3	Learn tools and techniques for Prototyping and Evaluating User Experiences

Course Outcomes (CO): At the end of the course, the students will be able to:

MCA503.1	Understand and create interest in User Experience Design(UXD)
MCA503.2	Analyze the framework and methodological approach for user experience design.
MCA503.3	Apply prototyping and problems solving techniques related to user experience design.
MCA503.4	Design real life application with end-to-end understanding of User experience practices.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to UX Design**	What is UX, Ubiquitous interaction, Emerging desire for usability, From usability to user experience, Emotional impact as part of the user experience, User experience needs a business case, Roots of usability.	06
2	**The UX Design - life cycle**	Introduction, A UX process lifecycle template, Choosing a process instance for your project, The system complexity space, Meet the user interface team, Scope of UX presence within the team, More about UX lifecycles.	06
3	**The UX Design Process – Understand Users**	Introduction, The system concept statement, User work activity gathering, Look for emotional aspects of work practice, Abridged contextual inquiry process, Data-driven vs. model-driven inquiry, History. , Contextual Analysis, Extracting Interaction Design Requirements, Constructing Design-Information Models.	12
4	**The UX Design Process**	Information ,Architecture and Interaction Design and Prototyping Introduction, Design paradigms, Design thinking, Design perspectives, User personas, Ideation, Sketching, More about phenomenology, Mental Models and Conceptual Design, Wireframe, Prototyping	10
5	**The UX Design Process**	UX Evaluation and Improve UX Goals, Metrics and Targets, UX Evaluation Techniques.- Formative vs summative ,types of formative and informal summative evaluation methods, types of evaluation data, some data collection technics, variations in formative evaluation results, informal summative dada analysis, formative data analysis , feedback to process ,evaluation report	12
6	**UX methods for Agile Development**	Introduction, Basics of agile SE method , drawbacks of agile SE method from the UX perspective, A synthesized approach to integrate UX	06

Pre-requisites:
    Database Management Systems, SQL

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEODLE5041.1	Provide fundamental techniques and principles of Big Data Analytics
CEODLE5041.2	Identify the tools required to manage and analyze Big Data
CEODLE5041.3	Understand the data analytics techniques required to solve complex real world problems

Course Outcomes (CO): At the end of the course, the students will be able to:

MCADLE5041.1	Develop and maintain reliable, scalable systems using Apache HADOOP
MCADLE5041.2	Write Map Reduce based application
MCADLE5041.3	Differentiate between conventional SQL and NoSQL
MCADLE5041.4	Analyze and develop Big Data solutions using HIVE and PIG

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction**	Distributed file system and its issues, Introduction to big data, big data characteristics, types of big data, traditional vs. big data approach, big data applications	08
2	**Hadoop**	Why Hadoop? Hadoop architecture, Hadoop components HDFS and YARN, comparison between YARN 1 and YARN 2 architecture, HDFS federation : Name Node, Data Node, Resource Manager, Job Tracker, Task Tracker Hadoop Ecosystem : Scoop, HIVE, PIG, Flume, Zookeeper, HBASE Hadoop installation in pseudo distribution mode, running HDFS commands	10
3	**Map Reduce**	Understanding Map Reduce, Map Task, Reduce Task, speculative execution, partioner and combiner in Map Reduce Running sample Map Reduce Program: Word Count. Algorithm using Map Reduce : -matrix vector multiplication, -grouping and aggregation -relational algebra operations	10
4	**NoSQL**	What is NoSQL? NoSQL - Case study, data architecture pattern: key value, column family, document store. HBASE overview, HBASE data model, row oriented vs. column oriented storage, HBASE architecture, HBASE shell commands	08
5	**HIVE**	HIVE : background, architecture, warehouse directory and meta-store, HIVE query language, loading data into table, HIVE built-in functions, joins in HIVE, HIVE installation, HiveQL: querying data, sorting and aggregation	08
6	PIG	PIG : background, architecture, PIG Latin Basics, PIG execution modes, PIG processing – loading and transforming data, PIG built-in functions, filtering, grouping, sorting data Installation of PIG and PIG Latin commands	08

Pre-requisites:
> Understanding of basic computer science concepts, data structures and good understanding of Mathematical Concepts is required.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEODLE5042. 1	Understand Machine Learning and its techniques.
CEODLE5042. 2	Study regression, classification with AdaBoost and clustering methods.
CEODLE5042. 3	Understand support vector machine, Dimensionality reduction, Anomaly Detection, Recommender Systems

Course Outcomes (CO): At the end of the course, the students will be able to

MCADLE5042.1	Analyze the Machine Learning techniques.
MCADLE5042.2	Apply regression, classification with AdaBoost and clustering methods to real world applications.
MCADLE5042.3	Describe support vector machine, Dimensionality reduction, Anomaly Detection, Recommender Systems

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Understand Machine Learning**	Introduction to Machine Learning, Overview of Machine Learning, Key Terminology and task of ML, Applications of ML, Software Tools, Introduction to Big Data and Machine Learning, Hypothesis space, Estimate hypothesis accuracy, Hypothesis testing	06
2	**Supervised Learning-Classification**	Introduction to Supervised Learning: Classification, Decision Tree Representation- Appropriate problem for Decision Learning, Decision Tree Algorithm, Hyperspace Search in Decision Tree Naive Bayes- Bayes Theorem , Classifying with Bayes Decision Theory , Conditional Probability, Bayesian Belief Network	08
3	**Supervised Learning-Regression**	Regression: Linear Regression- Predicting numerical value, Finding best fit line with linear regression, Regression Tree- Using CART for regression Logistic Regression - Classification with Logistic Regression and the Sigmoid Function	08
4	**Support Vector Machine**	Introduction : Separating data with maximum margin, Finding the maximum margin, Effective optimization with SMO algorithm	08
5	**Improving classification with the AdaBoost**	Classifier using multiple samples of the data set, Improving classifier by focusing on error, weak learner with a decision stump, Implementing the AdaBoost algorithm, Classifying with AdaBoost	08
6	**Unsupervised Learning**	Clustering: Learning from unclassified data –Introduction to clustering, K- Mean Clustering, Expectation-Maximization Algorithm(EM algorithm),Hierarchical Clustering, Supervised Learning after clustering	08
7	**Additional Core Techniques**	Dimensionality reduction- Dimensionality reduction techniques, Principal component analysis, Anomaly Detection, Recommender Systems	06

Assessment:

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any three from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Pre-requisites:
Computer Networks

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEODLE5043. 1	Understand the concepts of IOT
CEODLE5043. 2	Study IoT Architecture
CEODLE5043.3	Understanding the technologies used to build IoT applications.

Course Outcomes (CO): At the end of the course, the students will be able to

MCADLE5043.1	Identify the use of IoT from a global context.
MCADLE5043.2	Design application using IoT.
MCADLE5043.3	Analyze the IoT enabling Technologies
MCADLE5043.4	Determine the real world problems and challenges in IoT .

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**M2M to IoT**	**M2M to IoT** – The Vision, Introduction: **M2M** ,IoT, From M2M to IoT,M2M towards IoT – the global context, Differing characteristics, M2M value chains, IoT value chains,An emerging industrial structure for IoT, The international-driven global value chain and global information monopolies ,M2M to IoT – An Architectural Overview-,Building an architecture, Main design principles and needed capabilities, An IoT architecture outline, Standards considerations	**10**
2	**IoT Architecture**	**IoT Architecture** – State of the Art Introduction,State of the art, Architecture Reference Model, Introduction, Reference model and architecture, IoT reference model, IoT Reference Architecture, Introduction, Functional view, Information view, Deployment and operational view, Other relevant architectural views	**08**
3	**IoT Enabling Technologies**	**IoT Enabling Technologies** -- Wireless Sensor Networks , Cloud Computing ,Big Data Analytics, Communication Protocols,Embedded Systems	**08**
4	**Real-World Design Constraints**	**Real-World Design Constraints**-Introduction,Technical design constraints – hardware , Data representation and visualization,Interaction and remote control	**04**
5	**Open – Source Prototyping Platforms for IoT**	**Open – Source Prototyping Platforms for IoT**- Basic Arduino Programming Extended Arduino Libraries,Arduino – Based Internet Communication, Raspberry PI,Sensors and Interfacing	**08**
6	**Data Management**	**Data Management**, Business Process in IoT, IoT Analytics, Creative Thinking Techniques, Modification,Combination Scenarios, Decentralized and Interoperable ,Approaches, Object – Information Distribution,Architecture, Object Naming Service (ONS), Service Oriented Architecture, Network of Information, Etc.	**08**
7	**Domain specific**	**Domain specificHome Automation** - Smart Lighting ,Smart Appliances , Intrusion Detection , Smoke/Gas Detectors **Energy**-Smart Grids ,Renewable Energy Systems ,Prognostics **Health & Lifestyle** -Health & Fitness Monitoring ,Wearable Electronics **Agriculture** - Smart Irrigation ,Green House Control **Retail**- Inventory Management , Smart Payments ,Smart Vending Machines **Cities** -Smart Parking ,Smart Lighting ,Smart Roads ,Structural Health Monitoring ,Surveillance ,Emergency Response	**06**

Prerequisite:
Computer Graphics

Course Educational Objectives (CEO): At the end of the course students will be able to

CEODLE 5044.1	Study various multimedia system design components.
CEODLE 5044.2	Understand compression and decompression techniques and different image formats.
CEODLE 5044.3	Interpret storage and retrieval technologies, Project planning and costing.

Course Outcomes (CO): At the end of the course, the students will be able to

MCADLE 5044.1	Perceive multimedia architecture and its latest applications.
MCADLE 5044.2	Implement compression, decompression techniques and different formats for image, audio and video.
MCADLE 5044.3	Plan and develop multimedia projects

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Fundamentals of Multimedia Systems Design**	An Introduction Multimedia Systems, Design Fundamentals, Elements of multimedia, Multimedia system architecture - High resolution graphics display, IMA Architectural Framework, Network architecture for multimedia systems , Defining objects for Multimedia systems: Text, Images, Audio and video	07
2	**Multimedia Input and Output Technologies**	Key Technology Issues, Touch screen, Pen Input, Video and Image Display Systems, Print Output Technologies, Image Scanners, Digital Voice and Audio, Video Images and Animation, Full Motion Video.	11
3	**Multimedia File format and standards**	RTF, TIFF,RIFF, MIDI, JPEG DIB, AVI, MIDI audio, JPEG & MPEG standards, MIDI Vs Digital Audio, Analog display standards ,Digital display standards, Digital video	10
4	**Compression and Decompression Techniques**	Introduction to coding and compression techniques- Lossy and Lossless , Entropy encoding, Run length encoding, Huffman coding, JPEG compression process, Discrete Cosine Transform, Video compression- MPEG-1, MPEG-2, MPEG-4, Audio Compression-MPEG, Adaptive differential pulse code modulation,	12
5	**Storage and retrieval technologies**	Magnetic Media Technology, RAID-Level-0 To 5, Optical Media, WORM optical drives	06
6	**Planning and costing**	Idea Analysis, Pretesting, Task Planning, Prototype Development, Alpha Development, Beta Development, Delivery, Scheduling, Estimating	06

MCA ILE5051	**Intellectual Property Rights and Patents**	**20**	**20**	**20**	**80**	**--**	**--**	**--**	**100**

Pre-requisites:
   Basic understanding of morals/ethics, social values and technical writing.

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOILE5051.1	Understand basics of intellectual property.
CEOILE5051.2	Relate the knowledge of Intellectual Property Laws of India as well as International treaty procedures.
CEOILE5051.3	Get acquaintance with Patent search and patent filing procedure and applications.

Course Outcomes (CO): At the end of the course, the students will be able to:

MCAILE5051.1	Understand Intellectual Property assets.
MCAILE5051.2	Assist individuals and organizations in capacity building.
MCAILE5051.3	Distinguish information across organizations.
MCAILE5051.4	Work for development, promotion, protection, compliance, and enforcement of Intellectual Property and Patenting.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to IPR**	**Introduction:** Concepts and meaning of Intellectual property, IPR, Different category of IPR instruments - Patents, Trademarks, Copyrights, Industrial Designs, Semiconductor Integrated Circuits Layout-Design, Plant variety protection, Geographical indications, Transfer of technology etc. **Indian Scenario of IPR**: Introduction, History of IPR in India, Overview of IP laws in India, Indian IPR, Administrative Machinery, Major international treaties signed by India.	10
2	**Ownership and Enforcement of IPR**	**Enforcement of Intellectual Property Rights:** Introduction, Extent of problem, Factors that create and sustain counterfeiting/piracy, International Organizations, Agencies, and treaties active in IPR enforcement (e.g. INTA,WIPO,WTO, Madrid Protocol, Paris convention, NAFTA,TRIPS). **Ownership of intellectual property rights:** Ownership, Changes of Ownership	08
3	**Emerging Issues and Management of IPR**	**Emerging Issues of IPR:** IPRrelationship with software and technology, Challenges for IP in digital economy, e-commerce, human genome, biodiversity and traditional knowledge etc. **Management of IPR:** Introduction, Overall management of IPRs ,Management of non-registrable rights	06
4	**Copyrights**	Introduction and law, Types of copyright, Ownership and duration of copyright, Marking, Moral rights, Other relevant law, Copyright use and misuse, Exceptions to copyright infringement – fair dealing, Taking action against infringers, Criminal liability, Copyright licenses, Copyright internationally – general and non-technical works, Technical copyright, Copyleft, Managing copyright	08
5	**Trademarks**	Introduction to trade marks, Registrable trademarks, Unregistered trademarks, 'get-up' and 'passing-off', Criminal provisions and counterfeiting, Avoid being sued, Trade marks in other countries, Domain names	07
6	**Patents**	Introduction, Process to get a patent, Filing a patent application, Patent applications in India and other countries, Search Patents on Indian Patent Office Website	08
7	**Confidential information**	Introduction, Confidential disclosure, Employees, Confidential computer programs, Unwanted confidences, Managing confidential information, Know-how and show-how, Legal remedies, Confidentiality in other countries, Summary of confidentiality	05

Pre-requisites:
  Basic knowledge of Mathematics for Data Analysis, Software, Internet

Course Educational Objectives (CEO): At the end of the course, the students will be able to:

CEO ILE5052.1	To understand Research and Research Process
CEO ILE5052.2	To acquaint students with identifying problems for research and develop research strategies
CEO ILE5052.3	To familiarize students with the techniques of data collection, analysis of data and interpretation

Course Outcomes (CO): At the end of the course, the students will be able to:

MCAILE5052.1	Prepare a preliminary research design for projects in their subject matter areas
MCAILE5052.2	Accurately collect, analyze and report data
MCAILE5052.3	Present complex data or situations clearly
MCAILE5052.4	Review and analyze research findings Get the knowledge of objectives and types of research

Syllabus

Sr. No	Module	Detailed Contents	Hrs
1	**Introduction and Basic Research Concepts**	Research – Definition; Concept of Construct, Postulate, Proposition, Thesis, Hypothesis, Law, Principle. Research methods vs Methodology, Need of Research in Business and Social Sciences, Objectives of Research , Issues and Problems in Research , Characteristics of Research: Systematic, Valid, Verifiable, Empirical and Critical	10
2	**Types of Research**	Basic Research , Applied Research , Descriptive Research,Analytical Research , Empirical Research ,Qualitative and Quantitative Approaches	08
3	**Research Design and Sample Design**	Research Design – Meaning, Types and Significance , Sample Design – Meaning and Significance Essentials of a good sampling Stages in Sample Design Sampling methods/techniques Sampling Errors	10
4	**Research Methodology**	Meaning of Research Methodology ,Stages in Scientific Research Process: Identification and Selection of Research Problem , Formulation of Research Problem , Review of Literature , Formulation of Hypothesis , Formulation of research Design , Sample Design , Data Collection , Data Analysis , Hypothesis testing and Interpretation of Data , Preparation of Research Report	08
5	**Formulating Research Problem**	Considerations: Relevance, Interest, Data Availability, Choice of data, Analysis of data, Generalization and Interpretation of analysis	08
6	**Outcome of Research**	Preparation of the report on conclusion reached , Validity Testing & Ethical Issues , Suggestions and Recommendation	08

Pre-requisites:
      Information Technology in Management

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOILE5053.1	Understand the nature of management information systems and their applications in business
CEOILE5053.2	Learn the core activities in the systems development process.
CEOILE5053.3	Identify the major management challenges in building and using information systems.

Course Outcomes (CO): At the end of the course, the students will be able to

MCAILE5053.1	Understand theoretical aspects of Management Information Systems
MCAILE5053.2	Know the procedures and practices for performing information system planning and design.
MCAILE5053.3	Gain knowledge in various Decision Support Systems
MCAILE5053.4	Understand the implications of Management Information Systems on business

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Management Information Systems**	Perspectives on Information Systems, Nature and scope of MIS, Characteristics of MIS, Need and Role of MIS, Impact of MIS, functions and future of MIS, MIS: A support to the management, MIS: organization effectiveness, MIS for a digital firm, Case Study	09
2	**Strategic Design and Development of MIS**	Strategic Management of the Business, Strategic design of MIS,Business Strategy Implementation, Development of Long Range Plans of MIS, Ascertaining the class of Information, Determining the Information Requirement, Development and Implementation of MIS, MIS: Development Process Model, case study.	10
3	**Decision Making**	Decision making concepts, Decision Analysis by analytical modelling, Behavioral concepts in decision making, Organizational decision making, MIS and Decision Making, Case Study	09
4	**Information, knowledge, Business Intelligence**	Information Concepts, Information :A Quality Product, Classification of the information, Methods of data and information collection, Value of information, General model of a human as a information processor, Summary of information concepts and their implications, Knowledge and knowledge management systems, Business Intelligence, MIS , and the Information and Knowledge, Case Study	10
5	**E-Commerce: Applications and Issues**	Introduction to E-Commerce, Scope of E-commerce, E-Commerce Applications and Issues, case study	07
6	**Securing Information Systems**	System Vulnerability and Abuse, Business value of security and control, Technology and Tools for protecting Information, Resources,case study	07

Pre-requisites:
    Basic knowledge of Hardware, software and networking

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOILE5054.1	Understand what Green IT is and how we can meet standards set for Green Computing
CEOILE5054.2	Comprehend Green IT from the perspective of hardware, software, storage, and networkingat the enterprise level.
CEOILE5054.3	Strategize Green Initiatives and look at the future of Green IT

Course Outcomes (CO): At the end of the course, the students will be able to

MCAILE5054.1	Create awareness among stakeholders and promote green initiatives in their environments leading to a green movement.
MCAILE5054.2	Adopt special skills such as knowledge about energy efficiency, ethical IT assets disposal, carbon footprint estimation.
MCAILE5054.3	Create eco-friendly environment.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Trends and Reasons to Go Green**	- Overview and Issues - Current Initiatives and Standards - Consumption Issues - Minimizing Power Usage - Cooling	**08**
2	**Introduction to Green IT**	- Green IT - Holistic Approach to Greening IT - Awareness to Implementation - Green IT Trends - Green Engineering - Greening by IT - Using RFID for Environmental Sustainability - Smart Grids - Smart Buildings and Homes - Green Supply Chain and Logistics - Enterprise-Wide Environmental Sustainability	**08**
3	**Green Hardware and Software**	**Green Hardware** - Introduction , - Life Cycle of a Device or Hardware , - Reuse, Recycle and Dispose **Green Software** - Introduction - Energy-Saving Software Techniques **Changing the way we work** - Going Paperless	**08**
4	**Green Data Centers and Storage**	**Green Data Centers** - Data Centre IT Infrastructure - Data Centre Facility Infrastructure: Implications for Energy Efficiency - IT Infrastructure Management - Green Data Centre Metrics **Green Data Storage** - Introduction - Storage Media Power Characteristics - Energy Management Techniques for Hard Disks - System-Level Energy Management **Green Networks and Communications** - Introduction - Objectives of Green Network Protocols - Green Network Protocols and Standards	**08**
5	**Enterprise Green IT Strategy**	- Introduction - Approaching Green IT Strategies	**08**

		• Business Drivers of Green IT Strategy • Business Dimensions for Green IT Transformation • Organizational Considerations in a Green IT Strategy • Steps in Developing a Green IT Strategy • Metrics and Measurements in Green Strategies • Organizational and Enterprise Greening • Greening the Enterprise: IT Usage and Hardware	
6	**Managing and Regulating Green IT**	**Managing Green IT** • Introduction • Strategizing Green Initiatives • Implementation of Green IT • Information Assurance • Communication and Social Media **Regulating Green IT** • Introduction • The Regulatory Environment and IT Manufacturers • Non-regulatory Government Initiatives • Industry Associations and Standards Bodies • Green Building Standards • Green Data Centres • Social Movements and Greenpeace **The Future of Green IT** • Green Computing and the Future • Megatrends for Green Computing • Tele-presence Instead of Travel • Tele-commuting Instead of Commuting • Deep Green Approach	12

Basic understanding on Java programming and XML

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOL501.1	Understand the entire Android Apps Development Cycle
CEOL501.2	Apply the advanced android development techniques
CEOL501.3	Conceptualize the design of user applications using User Experience Design.

Course Outcomes (CO): At the end of the course, the students will be able to

MCAL501.1	Demonstrate Android activities life cycle
MCAL501.2	Apply proficiency in coding on a mobile programming platform.
MCAL501.3	Design and develop innovative android applications
MCAL501.4	Create real life application with end-to-end understanding of User experience practices.

Syllabus

Sr. No.	Module	Detailed Contents	Hrs
1	**Introduction to Android**	The android platform, the layers of android, Four kinds of android components, understanding the androidManifest.xml file, creating an android application Introduction to android SDK, Exploring the development environment	04
2	**User interfaces**	Creating the activity, working with views, using resources Working with intents and services, Different types of layouts, components.	06
3	**Storing and Retrieving data**	Using the file system, working with shared preferences, persisting data to a database, Working with content providers	10
4	**Graphics and animation, Multimedia**	Drawing graphics in android, creating animations with androids graphics API,Playing audio & video, Capturing media	06
5	**Location, Sensors**	Using Location Manager and Location Provider, working with maps, Working with GPS, Bluetooth and WiFi, Integrating google maps, services for push notificationGoogleads.	04
6	**REST API integration**	UsingAsyncTask to perform network operations, introduction to HtttpUrlConnection and JSON, performing network operations asynchronously, working with OkHttp, Retrofit and Volley	08
7	**Database connectivity and distributing androidapplication**	SQLite Programming, Android database connectivity using SQLite , distribution options, packaging and testing the application, distributing applications on google play store	08
8	**Open source UX tools**	Study of open source UX tools	02
9	**Creating new prototype**	selecting device, defining prototype settings	02
10	**Identify and describe the objectives for UED experiment**	a. Perform user research b. User requirement collection c. User Requirement Analysis d. Create User personas, user scenarios , customer journey maps	08
11	**UX Design – for Web and Mobile application**	a. Conceptual Design- Site Maps b. Create Wireframe c. Create Screens, Widgets, Outlines d. Setting properties e. Ordering Screens, Screen Transition f. Adding Actions & Triggers, Header & footer	08
12	**UX Evaluation**	a. Set UX Goals b. Perform UX Evaluation and Reporting c. Usability Test	02
13	**Mini project**	Developing mobile applications based on UED principles.	10

Assessment:
Term work consists of any two case studies or mini project covering the above syllabus.

Internal:
Assessment consists of two tests (T1 and T2) .The final marks should be the average of the two tests.

End Semester Theory Examination: Guidelines for setting up the question paper.

- Question paper will comprise of total six questions.
- Question Number One should be compulsory.
- All question carry equal marks.
- Students can attempt any three from the remaining.
- Questions will be mixed in nature (for example supposed Q.2 has part (a) from module 3 then part (b) will be from any module other than module 3).

In question paper weightage of each module will be proportional to number of respective lecture hours as mention in the syllabus.

Subject Code	Subject Name		Credits

MCAL502	**Open Source System for ADC Lab**	**--**	**--**	**--**	**--**	25	50	25	100

Pre-requisites:
 Basic overview of Advanced Distributed Computing and Cloud Computing.

Course Educational Objectives (CEO): At the end of the course student will be able to

CEOL502.1	To Understand Concepts of distributed and cloud computing
CEOL502.2	To learn open source technology.
CEOL502.3	To teach various protection and security mechanisms for data using cloud concepts

Course Outcomes (CO): At the end of the course student will be able to

MCAL502.1	Design and Develop the solution to a problem using java concepts
MCAL502.2	Demonstrate use of java Concepts
MCAL502.3	Explore various advanced distributed concepts.

Syllabus

Sr. No.	Session	Detailed Contents	Hrs
1	Remote Process Communication	**Develop a program for multi-client chat server.** **Concept:** Develop a multi-client chat server application where multiple clients chat with each other concurrently. The messages sent by different clients are first communicated to the server and then the server, on behalf of the source client, communicates the messages to the appropriate destination client.	08
2	Remote Procedure call	**Implementation of Remote Procedure Call** **Concept:** This application will demonstrate the remote procedure communication. a) Implement a Server calculator containing ADD(),MUL(),SUB() etc. b) Implement a Date Time Server containing date() and time()	08
3	Remote Method Invocation	**Remote Method Invocation supporting the distributed computing in java.** **Concept:** Create a client and server application where the client invokes methods via an interface. These methods are implemented on the server side. Create the necessary STUBS and SKELETONS. a) Design a Graphical User Interface (GUI) based calculator (scientific or standard). Operations should be performed using both mouse and keyboard. b) Retrieve time and date function from server to client. This program should display server date and time. c) Equation solver. The client should provide an equation to the server through an interface. The server will solve the expression given by the client. $(a-b)2 = a2 - 2ab + b2$; If $a = 5$ and $b = 2$ then return value $= 52 - 2.5.2 + 22 = 9$.	14
4	Memory Management	**Implementation of Shared Memory** a) Write a program to increment counter in Shared memory	04
5	Remote Object Communication	**Remote objects for database access.** **Concept:**Pass remote objects from the server to the client. The client will receive the stub object (through remote interfaces) and saves it in an object variable with the same type as the remote interface. Then the client can access the actual object on the server through the variable. Make use of JDBC and RMI for accessing multiple data access objects. a) Retrieve the students information from the college database. b) Retrieve the list of books available in the library. c) Retrieve the MTNL billing information from the MTNL database	10
6	Enterprise Java Beans	1) Sample program for basic arithmetic operations implemented in session bean. 2) Sample program on message bean demonstration.	10

		3)Sample program to Book Information using Entity bean 4) Demonstrate a program on Statefull and Stateless Bean.	
7	**Mutual Exclusion**	**Implementation of mutual exclusion using any of the technique.** **Concept**: This technique solves the mutual exclusion existing in the process communication. a) Centralized b) Distributed c) Token Ring **Note:** Use any one technique	**08**
8	**Cloud Computing**	**Study of cloud technologies :** Virtualization Technologies, Virtual Machine Technology, Cloud data center	**08**
9	**Grid Services**	**Study of Grid services using various tools.(any two)**	**02**
10	**Case studies**	Google, Microsoft, AWS.	**06**

Based on the recommended syllabus student should provide one Presentation/Case study.

Pre-requisites:

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOPR501.1	Conceptualize knowledge with emphasis on team work, effective communication, critical thinking and problem solving skills.
CEOPR501.2	Adapt to a rapidly changing environment by having learned and applied new skills and new technologies.
CEOPR501.3	Study designing small projects in a multidisciplinary environment.

Course Outcomes (CO): At the end of the course, the students will be able to:

MCAPR501.1	Design, implement and evaluate a project.
MCAPR501.2	Gain project management skills.
MCAPR501.3	Work effectively and ethically in a team towards project development
MCAPR501.4	Demonstrate the ability to produce a technical document.

Sample Guidelines for Preparing and Documenting the Project Report

Sr. No.	Module	Detailed Contents
1	Introduction	- Introduction of the project - Problem definition - Objective of Project - scope of Project
2	Literature Survey	- Existing System - Proposed System - Knowledge Integration - Use Cases
3	Analysis	- Exploring Possibilities - Feasibility Analysis - Cost Benefit Analysis - Flowchart/ DFD/ER/UML diagram(any other project diagram
4	Methodology	- Criteria & constraints (Process models) - Tools used - Procedure
5	Design And Developing A Prototype	- Module design and organization - Data Design - user interface design - Model or Prototype
6	Project Execution Plan	Plan using Project Management Tools
7	Testing & Validation	Test cases and Report (based on manual & automation testing)
8	User Manual	- Explanation of Key functions - Method of Implementation - Forms - Output Screens
9	Conclusion	Project Conclusion & Future enhancement

- Rubrics guidelines to be followed during project evaluation.
- **REFERENCES should be written as**
  1. Author Name, Title of Paper/ Book, Publisher's Name, Year of publication
  2. Full URL Address

Parameters for Evaluation:
- The mini project is evaluated for 50 marks.
- Term work should be based on 2 presentations of ten marks each and five marks for documentation.
- Oral (25 marks) should be based on final demonstration and presentation.

** Mini Project will be performed by students during summer vacation of Even Semester of second year (SEM IV). Mini project will be evaluated in SEM V. Evaluation of the mini project will be internal 25 marks as TW and 25 marks as oral examination conducted by External Examiner.

University of Mumbai, M.C.A. , (Rev. 2016)

SEMESTER VI

Subject Code	Subject Name	Credits
MCAPR 601	**Internship- Project**	**15**

Subject Code	Subject Name	Teaching Scheme	Credits Assigned	
		Presentation	Project	Total
MCA PR601	**Internship- Project**	**30**	**15**	**15**

Subject Code	Subject Name	Examination Scheme				
		Theory Course				Total
		Internal Assessment			End Semester Exam	
		Presentation 1	Presentation 2	Total		
MCAPR601	**Internship-Project**	**25**	**25**	**50**	**100**	**150**

Pre-requisites: --

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEOPR601.1	Achieve hands on experience in an organization
CEOPR601.2	Relate classroom and textbook learning to the real world.
CEOPR601.3	Learn the professional skills and interpersonal relationship in professional environment

Course Outcomes (CO): At the end of the course, the students will be able to

MCAPR601.1	Attain an exposure to real life organizational and environmental situations
MCAPR601.2	Attain technical skills as per the requirements of the domain
MCAPR601.3	Adapt professional and interpersonal ethics.
MCAPR601.4	Articulate SDLC phases in developing software project and in writing the project document.

The guidelines regarding preparation of Internship-Project report for MCA SEM-VI

- To take hands-on experience of the real world, every candidate is required to undertake a project of 6 months duration in an organization of repute and must submit their project documentation.
- Each student should submit different documentation in a specified format illustrating his/her role/contribution in the project and write the documentation from his/her perspective.
- One copy should be submitted for University records which will be retained by the college and another one is student copy.
- Each student must submit one CD having the documentation part in PDF file format only.
- Hard copy of the project report must be submitted before a week of finalpresentation.
- Students have to present their project individually.

- Feedback form from the Industry should be submitted separately in sealed envelope to the internal guide.
- Students must ensure the originality of the work with ethics.

Assessment:

Internal:
Assessment consists of two presentations of 25 marks each.The final marks should be the sum of the two presentations.

Rubrics has to be followed during project evaluation.

Subject Code	Subject Name	Credits
MCA602	**Research Paper**	**01**

Subject Code	Subject Name	Teaching Scheme			Credits Assigned			
		Presentation	Pract	Tut	Presentation	Pract	Tut	Total
MCA602	**Research Paper**	**05**	**--**	**--**	**01**	**--**	**--**	**01**

Subject Code	Subject Name	Examination Scheme							
		Theory Marks				TW	Pract	Oral	Total
MCA602	**Research Paper**	Internal Assessment			End Semester Exam				
		Test1 (T1)	Test2(T2)	Average of T1 & T2					
		--	--	--	**50**	**--**	**--**	**--**	**50**

Course Educational Objectives (CEO): At the end of the course, the students will be able to

CEO602.1	Understand analytic approach towards choosing a research project and acquiring research skills
CEO602.2	Access relevant data and present new ideas related to area of research.
CEO602.3	Adhere to ethical standard of research.

Course Outcomes(CO): At the end of the course, the students will be able to

MCA602.1	Write a research paper.
MCA602.2	Present data coherently and effectively, outcome and counter-hypothesis
MCA603.3	Attain experience in preparation of research materials for publication or presentation.

Seminar (50 Marks)-

1. Students must have in depth study in a specialized area by doing a survey of published technical literature and write a research paper in IEEE format (6-9 pages).
2. The research topic must be approved from the Institute. The institute should set up a committee to scrutinize the topics and finalize the same
3. The research paper may be written in a group of maximum 2 students.
4. The research paper must be published in national/ international conference or national/ international journal of repute.
5. The bifurcation of marks for the seminar will be as follows:
    a.   Original Contribution – 10 marks
    b.   Paper Quality – Published (5 marks)
                         Contents (5 marks)
    c.   Documentation (Language format) – 10 Marks
    d.   Oral Presentation – 10 Marks
    e.   Conclusion (Future Scope/ Recommendations/ Suggestions/ Findings)-10 marks
