DLLE Poster making Contest

DLLE cell of TIMSCDR organized Poster making contest on theme "COVID-19 vaccination awareness" from 15 - 30 March 2021.

By Kaushik Gawad SY MCA

By Dhanesh Naik FY MCA

Entrepreneurship Success Story

My name is Devraj Raut and I'm a TIMSCDR Pass-Out of 2009 Batch (MCA). I have been a Cricketer all my Life and have represented Mumbai in the Under 14/16 & 19 Age Groups and also Represented West Zone Under-19 in 2004. Along with my Passion for Cricket, I was always fascinated and loved Science and Technology. I started my Professional Career as a Video Analyst for BCCI in 2007, worked with the Mumbai Ranji Trophy Team, BCCI Specialized Academy, and currently I'm the Performance Analyst of the India 'A' Team & India Under-19 Team since 2015, working under Cricketing Legend and Head of Cricket (NCA), Mr. Rahul Dravid.

Mr. Devraj Raut
2009 Alumni, TIMSCDR
Performance Analyst
India A & India U-19
Cricket Team, BCCI

Today, I'm here to share my first albeit small, Entrepreneurial venture. I had just returned from the ICC Under 19 Cricket World Cup from South Africa, where we lost to Bangladesh U-19 in the finals, in Feb 2020 and was having a much-awaited break at Home, when the Pandemic had made its way to India and everything went under lockdown. Sports all around the world had been hit and there were no signs of it returning in the near future. Having travelled the world almost Non-Stop for the past 5 years with the Indian Teams, it was difficult to fathom that I had to sit at home for the rest of the dreaded year 2020.

At first, it was great having so much free time and nothing to look forward to. But as the months passed, it became clear that I needed to do something productive with the time I have and not waste it. That's when I started making a list of things I could do, to keep myself occupied. Since my School and College Days, I had started learning to code and after I started to work, I never really had the time to sit and code. My mind was set and I decided that I need to get back to coding and develop something on my own.

Having my own iOS App in the Apple App Store had been on my Bucket list for many years and I decided to give it a crack. I started researching SwiftUI to build an iOS App, but I wanted to make an App for both Android and iOS Platforms. So, after a lot of research, I decided to start learning Flutter, which is a cross-platform Software Development Kit created by Google. I wanted to create a Workload Monitoring and Comparing App for Cricketers to use from the Grass Root to the Elite Level.

After 7 Months of learning to Code in a New Language and developing a Mobile App for the first time ever, I released CricWORK, iOS & Android

App on both the App Stores in Dec 2020. In these 7 months, I learnt Flutter, Firebase, App Designing, Figma & Web Designing along the way to get a finished product.

CricWORK is a Workload Monitoring App, which any Cricketer can use to Log his Batting, Bowling counts, along with his Strength Training and Running durations. His Sleep hours along with other important factors can be logged in. It verifies the Players Level of Cricket, and a Club Level Cricketer can compare his Workloads with the Average Workloads of his Peers and Elite Teams as well. Today my App has been Downloaded about 1.5K times by Cricketers as well as Coaches, Trainers & Physios, and has a good number of active users.

I always wanted to build Software for Cricket, which can be used by the Cricketing Fraternity and this was my attempt at it, only possible because of the Pandemic. But I didn't stop there. Throughout the year, because of my Professional Profile, I was interviewed by a lot of Social Journalists, was called on an Online Workshop to talk about my Experiences as a Performance Analyst. Seeing that the demand of the Career Path that I had taken 14 years back was very high, I decided to do something about it. I had the knowledge which other aspiring Cricket enthusiasts wanted, and so I decided to Conduct a Cricket Analysis Online Course for all interested participants.

After developing all the Course material myself, and formatting a Program which can be delivered Online, I advertised my Course on LinkedIn, Instagram and Facebook to a huge response. I'm currently delivering these Paid courses on Zoom to Aspiring Cricket Analysts & Coaches from India, USA, UK, Canada, UAE and Australia.

Until the Pandemic is under Control and Cricket resumes, I plan to continue developing New Apps for Cricket and conducting more courses from time to time, so as to keep myself occupied and continue doing what I Love the most, 'Being Connected to Cricket'.

Our Placements in A.Y. 2020-2021
